

**The Nation's Leading Independent  
Buyer's Guide for Office Equipment**

**Xerox Phaser 3260/DI**  
**Xerox Phaser 3260/DNI**  
*29ppm*

*Sum-up: Low-cost small-workgroup mono-chrome printers with standard Wi-Fi.*

These new Xerox Phaser printers are the latest entries in the small-workgroup mono-chrome lineup. There are two printers in this family: the Phaser 3260/DI (\$189) which is the base model that includes standard Wi-Fi connectivity, and the Phaser 3260/DNI (\$209) which includes standard Ethernet connectivity.

These models are powered by a 600MHz processor and start with 256MB of memory. Xerox rates these models for up to 30,000 pages per month. First-page-out time is a very good 8.5 seconds in.

USB and Wi-Fi are standard. The Phaser 3260/DNI includes standard Ethernet connectivity. PostScript and PCL are standard. Mobile printing is also offered by way of the Xerox PrintBack, Apple AirPrint, and Google Cloud Print.

Paper handling starts with a 250-sheet standard tray and a single-sheet multipurpose tray. There are no additional trays so the maximum input is 251 sheets. The output tray holds up to 150 sheets. Duplexing is standard.

Cost per page figures for these devices run at 3.4 cents when utilizing the high-capacity toner yields. This is a reasonable figure for this level of the market.

There are other printing features, such as N-up, Watermark, toner save mode, booklet printing, and ability to skip blank pages. Security features include 802.1 authentication, IPSec, and Mac address filtering. A one-year warranty is standard; Xerox offers additional 2- and 3-year warranties as options.

The Phaser 3260 devices are good buys for small offices or small workgroups that are looking for printing features only but don't require color. We like that they are affordable, have automatic duplexing, and have standard Wi-Fi connectivity. We give them our Innovative Product of the Year Awards.

*Xerox Phaser 3260/DI: Compact and affordable printer for the small office.*
