Section 1: Introducing the Xerox® ColorQube® 8880 Color Printer
Product Overview

Continuing the exclusive Xerox tradition of advanced cartridge-free Solid Ink, the ColorQube 8880 color printer is a powerful, no-fuss and waste-conscious printing solution that’s simple and highly productive with the advantage of superior color output.

Your Office, Greener
- **Less waste, less impact.** Packaging for the printer and Solid Ink sticks helps you create up to 90% less waste, lower Life Cycle energy demand and a smaller carbon footprint than comparable laser printers.
- **Earth Smart print driver settings.** Easy-to-use print-driver gauge allows you to choose the most environmentally conscious print settings.
- **Optimize energy usage.** Intelligent Ready technology learns your workgroup’s usage patterns and moves to low-power mode when you’re least likely to use it.
- **Bundled GreenPrint software.** Use the standard GreenPrint tool to help you print only the pages you want for reduced paper and ink usage.

True Cost Savings
- **Color for black-and-white prices.** With the ColorQube 8880 you can afford to print all your documents in attention-grabbing color.
- **The print volume advantage.** If you print at least four reams of paper each month, the ColorQube 8880 will deliver a total cost of ownership that’s hard to beat.
- **Save shipping costs and storage space.** Compared to toner, Solid Ink’s smaller packaging costs less to ship and is small enough to fit in a desk drawer.
- **Spend less on paper and ink.** Get standard two-sided printing and the N-up feature, which prints multiple pages on a single sheet.

More Color Performance
- **Incredible detail and halftones.** Xerox® 2400 FinePoint® print resolution ensures exceptional print quality.
- **Always superior color.** Solid Ink gives your documents rich, vibrant colors on all media, including recycled paper.
- **The colors you expect.** PANTONE® approved solid-color simulations and Xerox® color correction technology deliver results that always match your expectations.
- **More printing for longer.** A high monthly duty cycle of up to 120,000 images means you’ll have a reliable color printer for many years to come.
- **Print when you're ready.** A first-page-out-time as fast as 5 seconds means in most cases your print job’s ready by the time you walk to the printer.
- **Intuitive color correction.** The Color By Words feature lets you select desired color modifications from a simple drop-down list.

The Right Fit for any Environment
- **Choose productivity.** Add more memory to enable a variety of security and time-saving capabilities with a choice of two productivity kits.
- **Easy expandability.** Adding additional media trays increases total media capacity up to 2,200 sheets for periods of high workload and enables multiple tray sources for your diverse office printing needs.
- **Small footprint.** The ColorQube 8880 fits almost anywhere in your work space, whether on your desk or in a central location.
- **Total flexibility.** Get full compatibility with Windows®, Mac® and Linux® environments.
- **Save shipping costs and storage space.** Compared to toner, Solid Ink’s smaller packaging costs less to ship and is small enough to fit in a desk drawer.
- **Apple® AirPrint™.** Simplify printing of email, photos and important office documents directly from your Apple products with no drivers to install.
- **Mopria® certified.** Mopria certification simplifies the mobile printing experience for tablets and smartphones to many printing devices, including the ColorQube 8880.
- **The optional Xerox® Wireless Print Solutions Adapter** seamlessly connects your Xerox® printer or MFP to modern mobile and desktop workflows, regardless of your office environment. For more information, visit www.xerox.com/WPSA.
How do you know which color printer is the right fit? Based on continuous study of our customers’ requirements, Xerox recommends that you consider using the following criteria when evaluating which workgroup- or department-class color printer to purchase for your office.

This section examines each of the above evaluation criteria in greater detail, covering the specific features and performance attributes you should look for in a workgroup- or department-class color printer. When the same criteria are used to evaluate every printer under consideration, you’ll see how the Xerox® ColorQube® 8880 color printer excels against other manufacturers’ products.

When evaluating the costs of printing, it’s important to first think about your current actual printing costs. Once you understand the actual per-page costs of your printing activities, you’ll gain a deeper understanding of the total costs associated with your printer over its lifetime.

How the Xerox® ColorQube® 8880 exceeds the color costs requirement:

If you print lots of pages and lots of color, the ColorQube 8880 delivers exceptional color and a total cost of ownership that’s hard to beat.

**Color for Black-and-white Prices**

If you like the idea of replenishing your Solid Ink as you need it with no monthly commitment, simply pay as you go with the ColorQube 8880 – and get color for the cost of black-and-white.

The ColorQube 8880 enables your staff to take advantage of the power of color in every office document. And say goodbye to worrying about how much it costs. Color printing. Black-and-white price. It’s that simple.

**The Print-volume Advantage**

Companies can also evaluate their printing costs by considering the total cost of printing over the lifetime of the printer (total cost includes acquisition and operating costs). If your employees are printing 2,000 or more pages-per-month (four reams of paper or more), then it’s easy to see the cost savings you could experience with the ColorQube 8880.

Section 2: Evaluating Color Printers
Ease-of-use

When you purchase a new color printer and deploy it into your environment, ease-of-use is a critical factor in how well your employees adapt to the new device. How easy will it be for your employees to load supplies and keep the device running? Look for features that contribute to reliability and availability. Lastly, the user interfaces need to be well designed to help your employees maximize productivity.

How the Xerox® ColorQube® 8880 Exceeds the Ease-of-use Requirement:

Consumable Supplies
It doesn’t get any easier than Solid Ink. Like loading a stapler, simply open the printer and drop the ink into its corresponding slot. The inks are keyed to avoid loading into the wrong slot, and the cartridge-free design allows the inks to be topped off before the printer runs empty, without any workflow interruption. Solid Ink sticks are safe to handle and spill free – there is nothing to smudge your clothes.

Reliability Features
The ColorQube 8880 includes a variety of features that help maximize the availability and reliability of the device, ensuring you won’t have to wait for the printer to get your work done.

Intelligent Ready:
- System tracks your office usage patterns, warming up when your workday starts and going to sleep when your workday ends.

Xerox® PrintingScout®:
- Sends an automatic alert to your computer when attention is needed to complete a print job.
- Includes graphic instructions on how to resolve the issue, helping you get back up and running as quickly as possible.

Easy Interface
The ColorQube 8880 utilizes an interface designed to help your employees get the most out of the printer – whether they are programming a print job, managing system settings, or administering a fleet of network devices.

Front Panel Interface:
- Convenient access to regularly used features and settings, with easy access to more advanced features through the LCD display.
- Ink levels are reported in real time by color on the front panel and via the web.

Print Driver Interface:
- Intuitive print driver interface with easy access to commonly used features, and tab-based access to advanced programming features.

Management Tools:
- Xerox® CentreWare® IS – an embedded web server for employees and administrators to manage settings and get current system status.
- CentreWare Web – a web-based utility that simplifies management of network devices.
- Context Based Restrictions – a management feature that enables administrators to define how users print. For example, all users or specific users automatically print email messages in black-and-white, all Word documents print in duplex mode, and some groups automatically print from assigned paper trays. After parameters are set by the administrators at the device level, the print drivers reflect the printing capabilities for each user.

Color By Words: Unique Color Control
Have you ever wanted to change the color of one object or area in a printout without affecting the rest of the page? With the Color By Words feature there is no need to go back to square one and manipulate source files. You simply select the desired color modifications from a drop-down list, and Color By Words will adjust your printout.

Original photo not right? Use the Color By Words drop-down list and choose “yellow-green colors a lot more green,” and “red colors a lot more saturated.” Picture-perfect results.
Section 2: Evaluating Color Printers
Environmental Impact

How does a color printer put you on a path to a greener workplace?
Environmental impact can be assessed in a variety of ways. Does it have a lower total carbon footprint over the product lifecycle? Does it produce less waste? Can you get consistent image quality on environmentally friendly media?

How the Xerox® ColorQube® 8880 Exceeds the Environmental Impact Requirement:

Energy usage is only a small part of a product’s total impact to the environment. Experts agree that a product’s carbon footprint is a more complete measure of its cradle-to-grave impact on the environment.

Cartridge-free Solid Ink sticks avoid the excessive packaging of toner cartridges. That means fewer resources are used and less energy is invested in manufacturing and transportation. An independent 3rd party reviewed the lifecycle analysis for the ColorQube 8880 from manufacturing to end of life. The results? 90 percent less waste in your office and a smaller carbon footprint across the product life cycle*. Solid Ink stick packaging is made from post consumer waste that can be recycled locally where options are available. Compared to the multiple imaging units required throughout the life of a typical xerographic device, the ColorQube 8880 has only one customer replaceable component – a long-life Page Maintenance Kit with an average yield of 30,000 prints. Naturally, it can be recycled through the Xerox Green World Alliance (www.xerox.com/gwa).

The Intelligent Ready feature on the ColorQube 8880 learns your workgroup’s usage patterns and moves to low power mode when you’re less likely to need it and restores to print ready level when your office is busy.

Because Solid Ink produces brilliant color on recycled and other environmentally friendly paper – media that other printing technologies have trouble with – the ColorQube 8880 enables you to make the switch to recycled paper to help meet your company’s sustainability initiatives without sacrificing quality. The device also comes standard with two-sided printing, allowing you to cut your paper usage in half.

The ColorQube 8880 print driver includes Earth Smart settings, a new feature that allows users to choose default settings that encourage sustainability practices such as duplex print and draft mode.

The ColorQube 8880 also includes standard GreenPrint software, which automatically detects unnecessary pages, such as those with only a web address or a meaningless picture, and lets you select the pages you actually need to print, helping you reduce paper and toner usage. There’s even a counter that keeps track of the number and total weight of your conserved pages.

* Cartridge-free Solid Ink: Less to manufacture, no empty toner cartridges to dispose or recycle, and less storage space required than comparable laser devices. According to Life Cycle analysis, Solid Ink printers produce 90 percent less waste during use than comparable laser devices.
Sustainability is not just a nice-to-do at Xerox. We view it as a way of doing business, not as a cost of doing business. In fact, Xerox focused on environmental performance and sustainability long before it was popular to do so.

Consider:

- In the 1980s Xerox was the first company to introduce energy-saving power-down features on its equipment, and the first to make two-sided printing a standard on its systems, significantly reducing paper use.
- In 1997, Xerox was an early adopter of ISO 14001, an international standard for environmental management. An early adopter of the new standard, Xerox certified all its major manufacturing sites within a year of the standard’s development.

Xerox continues to use innovation and leadership to drive environmental performance through its value chain:

- Since 1991, more than 2 billion pounds of waste have been diverted from landfills through our Product Take-Back and Recycling Program.
- In 2003, Xerox joined the US EPA Climate leaders program and pledged to cut greenhouse gas emissions from worldwide operations by 10 percent from 2002 to 2012. Xerox reached that goal six years early, achieving an 18 percent reduction from the 2002 baseline by the end of 2006. Xerox has set a new goal to reduce total greenhouse gas emissions 25 percent by 2012.
- Xerox offers environmentally responsible choices for paper and media such as recycled media with up to 100% post-consumer recycled content and paper that adheres to internationally recognized standards for sustainable forestry management.

Section 2: Evaluating Color Printers

Productivity

In addition to actual print engine speed, consider the factors that affect overall throughput. Does the device produce color print quality that exceeds expectations? Can printer functions be monitored from users’ desktops and/or at the device?

How the Xerox® ColorQube® 8880 Exceeds the Productivity Requirement:

Speed

The ColorQube 8880 Color Printer has a first-page-out time as fast as 5 seconds, so users won’t have to wait long for their jobs.

Image Quality

Exclusive Xerox® Solid Ink produces outstanding color print quality, with natural vibrancy, glossiness and consistency on virtually any media, including recycled paper. The ColorQube 8880 delivers Xerox® 2400 FinePoint® resolution in High Resolution/Photo mode for exceptionally detailed text and images.

To ensure that printed output meets users’ high expectations, Xerox also delivers multiple Page Description Languages (PDLs) including Adobe® PostScript® 3™ and PCL® 5c emulation.

Network Performance

Performance isn’t limited to raw document feeds and speeds. Every ColorQube 8880 easily handles large, complex print jobs thanks to the device’s high-performance 1 GHz processor.

The ColorQube 8880 is easy on your network as well. With RAM collation, files are sent over the network just once no matter how many sets are printed. Job pipelining allows the printer to process print jobs even if the print engine is busy with an earlier print job – thus optimizing system performance by avoiding delays during job processing.

With Solid Ink technology and Xerox® 2400 FinePoint® print resolution, the ColorQube 8880 delivers superior color quality and exceptional detail.
Section 2: Evaluating Color Printers
Installation and Deployment

Installing and deploying a fleet of printers throughout your organization is a potentially time-consuming, complicated process. The process isn’t limited to physically placing the units in their new environments, but also includes integrating the devices with the existing network infrastructure.

How the Xerox® ColorQube® 8880 Exceeds the Installation and Deployment Requirements:

Installation

When you choose Xerox, you can rest assured that your equipment will be delivered and installed to your specifications and expectations. The ColorQube 8880 comes standard with 10/100/1000Base-T Ethernet connection, with features including automatic IP addressing, device naming and Ethernet speed sensing to provide simple and automatic network installation. Management and system setup can be accomplished through a variety of means, including easy wizard-based processes found within Xerox® CentreWare® Web.

Deployment

With the ColorQube 8880, print drivers can be deployed centrally, thereby eliminating the need for IT staff to perform desk-to-desk manual installation of the driver software. CentreWare Web wizards are provided to aid in the processes of installing, troubleshooting and upgrading print drivers for employees, freeing up IT personnel for more pressing projects. Driver support is delivered for Windows® (Server 2003/2008/XP/Vista/7), including most operating systems with 32- and 64-bit drivers; Macintosh OS® 10.7 and higher; and multiple UNIX and Linux platforms.

Plus the ColorQube 8880 supports two innovative new print drivers that can greatly simplify installing, managing and supporting printers and multifunction devices on the network, and increase end-user productivity:

- Xerox® Mobile Express Driver® makes it easy for mobile users to find, use and manage Xerox® and non-Xerox® devices in every new location. Plug into a new network, and Xerox® Mobile Express Driver® automatically discovers available printers and provides status and capability information. Save a list of “favorite” printers for each location, store application print settings for use on any printer in any network, and greatly reduce mobile support calls to IT.

- Xerox® Global Print Driver® is a truly universal print driver that lets IT administrators install, upgrade and manage Xerox® and non-Xerox® devices from a single driver. It provides a consistent, easy-to-use interface for end-users, reducing the number of support calls, and simplifying print services management.

In addition, these drivers provide users with a consistent single interface for all printers, with real-time, dynamic reports of printer status. As a result, users can easily identify the best printer for their needs, quickly choose the correct options and see updated consumables status without the assistance of IT. To learn more, and download these drivers for free, visit www.xerox.com/global and www.xerox.com/mobile.
Section 2: Evaluating Color Printers
Security Capabilities

What type of security requirements does your office require? Does the printer have the security features to meet this demand? Can printer access be password protected? Does the printer remove latent images on disk drives and in memory?

How the Xerox® ColorQube® 8880 Exceeds the Security Requirement:

Integrated Security

Xerox is committed to the security of its products and takes a unique approach to security within the document industry: Xerox believes security should be built in as a core component of the printer and its controller.

Security features of the ColorQube 8880 include:

- **802.1X Support** – Ensures devices connected to the network are properly authorized.
- **Authentication**
  - **System Administrator Authentication** – The ColorQube 8880 allows access to administrative web pages to be restricted to authorized employees. Device Access Password Protection further restricts access to device setup screens and remote network settings.

- **Firewall** – Restricts access via IP Address Filtering, Domain Filtering and Port Blocking.
- **Audit Log** – Permits tracking of activity at the device, satisfying the needs of organizations that must provide logging of the transfer of Personally Identifiable Information per regulations like HIPAA, Sarbanes-Oxley, Gramm-Leach-Bliley Act and more.
- **IP Filtering** – Prevents unauthorized network access based on IP address or port number.
- **Print Channel Encryption** – Delivering secure communication via IPsec.
- **Secure Data Protocols** – The ColorQube 8880 supports HTTPS, enabling Xerox® CentreWare® Internet Services setup via industry standard Secure Sockets Layer (SSL) technology.

For more information regarding Xerox security, visit: [www.xerox.com/security](http://www.xerox.com/security)
Office productivity relies on tools that do their jobs day in and day out. Consider how often you need to intervene to replace paper or other consumables or to clear jams. How easy is that intervention, and how long is the device typically down? If outside assistance is required, how easy is it to schedule and how long do you have to wait? Is the device a reliable network citizen? Has it been tested and certified by independent industry participants?

**How the Xerox® ColorQube® 8880 Exceeds the Reliability Requirement:**

### Day-to-day Reliability

Xerox introduced its first Solid Ink printer in 1991. In the years since, Xerox® Solid Ink printers and MFPs have come to be regarded as some of the industry’s most reliable color printing solutions.

The ColorQube 8880 builds on our Solid Ink expertise, providing maximum device uptime. And because the ColorQube 8880 has been engineered with a simple paper path and minimal moving parts, the printer helps optimize day-to-day reliability.

With a possible maximum paper capacity of up to 2,200 sheets, the ColorQube 8880 can also drastically reduce paper-reloading interruptions. Besides the ink sticks, the one customer replaceable unit is a long-life Page Maintenance Kit, which is as simple to replace as the ink sticks themselves.

Further, the ColorQube 8880 can diagnose potential problems and fix them ahead of time, reducing maintenance and service calls. Xerox® CentreWare® alerts can be configured to automatically inform IT staff of an interruption in service. In the event a print-head jet becomes clogged, the other adjacent jets automatically compensate for it so the device can remain in use until the problem self fixes during its calibration process. No service call is required.

### Service / Support

Building on the reliability engineered into the ColorQube 8880, Xerox has trained and developed a sophisticated service-delivery network capable of maintaining your equipment, addressing issues users may encounter, and training IT staff and employees on how to get the most out of the equipment.
The following sections provide details about the various Xerox® ColorQube® 8880 configurations, available options and supplies, and more helpful information.

Unrivaled Service and Support

Behind every Xerox® product is a large network of customer support that’s unrivaled in the industry and available when you need it. Xerox service professionals use leading-edge technologies to keep you up and running. They’re even linked to the engineers who designed your product, so you can be confident when you choose Xerox. And genuine Xerox® supplies are always readily available.

Total Satisfaction Guaranteed

The exclusive Xerox Total Satisfaction Guarantee, recognized as unique in the industry, covers every Xerox® ColorQube® device that has been continuously maintained by Xerox or its authorized representatives under a Xerox express warranty or Xerox Maintenance agreement. You decide when you’re satisfied.

Xerox® Office Services Support

Asset Management Services

- Asset Optimization and Tracking – Process and tools to optimize an enterprise’s office output infrastructure and reduce hard costs.
- Break-Fix Management – Single point of ownership and management for break-fix service of all brands of office output devices, regardless of manufacturer.
- Supplies Management – Process and tools to procure, monitor and replenish all document-related supplies proactively.

Imaging and Output Management Services

- Output Management – Single point of management of office output from all output devices, regardless of manufacturer.
