

XEROX®

Phaser® EX7750

With EFI Fiery Network Color Server

Precise color.
Faster.
Affordable.

Xerox Phaser® EX7750 with Fiery Network Color Server for outstanding color tools and print performance

Whether you're proofing for production or printing on demand, the Xerox Phaser EX7750 color printer with the Fiery Network Color Server delivers output that matches your expectations. With color that's accurate, predictable — *and fast*. And tools that help you master complex layouts and variable data printing. It's a total solution that delivers knockout prints — seamlessly and affordably.

Xerox Phaser EX7750DXF includes a High-Capacity Feeder and a 1,000-sheet Finisher with stapling and offset stacking.

True Fiery Workflow

The powerful and easy-to-use tools you need for creating, managing and producing outstanding color.

- Standard Fiery Command WorkStation® 4.2 (Windows) and LE 1.0 (Mac OS X only) software to streamline queue and print job management
- Fiery FreeForm™ 2 for variable data printing
- Standard Fiery Graphics Arts features include EFI Spot-On® and Auto Trapping
- Optional EFI Impose v2.5 software for advanced imposition capability

Remarkable Print Quality

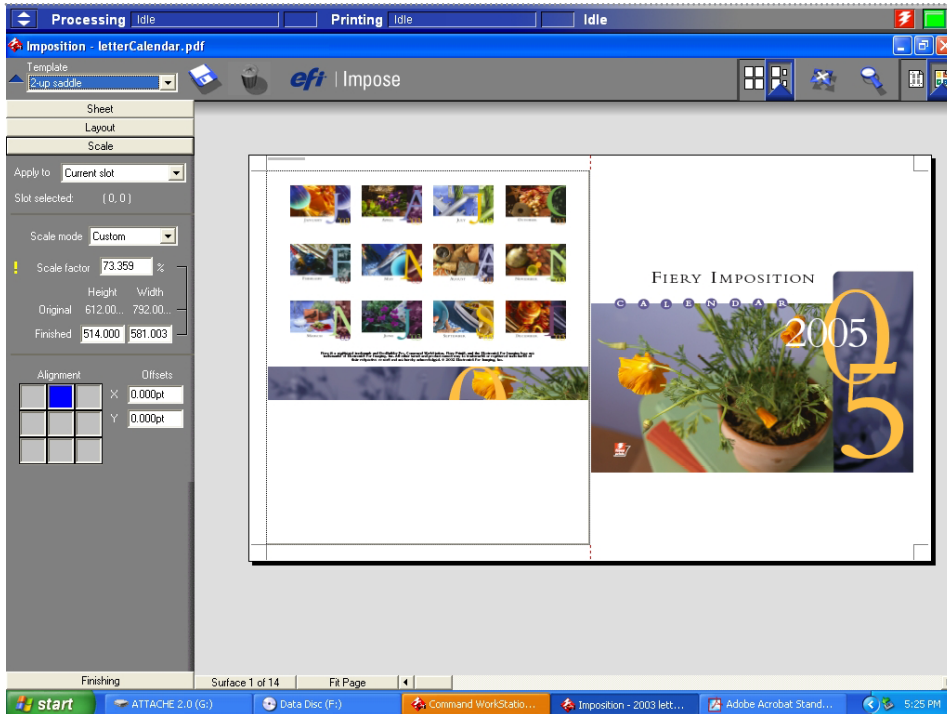

Expect terrific resolution and consistent, accurate quality, page after colorful page.

- 600 x 600 x 4 dpi in standard mode
- Enhanced gloss mode for plain paper with 1200 x 1200 x 1 dpi resolution
- Automatic printer calibrations keep color consistent day in, day out
- Advanced color management for extra fine-tuning precision

Superb Performance at an Attractive Price

Get value-packed performance features and accessories that get the job done fast.

- A speedy 35 ppm for quick outputs with lightning fast RIP speeds for complex jobs
- 60 GB hard drive for high-volume file storage and queue management
- As fast as 11 seconds until the first color page out
- Reliably handles the widest range of media weights (up to 255 gsm) and custom sizes
- 1,000-sheet Finisher with offset stacking and stapling to simplify your workload (DXF model)
- Five feeder trays for a total capacity of 3,150 sheets (DXF) or 2,150 sheets (GX)

Imposition Tools

Create documents that impress your audience without going to design school.

Using the new, enhanced version of EFI Impose v2.5 (optional), even a novice can create documents, such as tri-fold, Z-fold and gatefold brochures — with the software that you are accustomed to using. An easy-to-use interface, new template options and advanced editing enable you to create jobs that you used to send to a design studio. EFI Impose v2.5 is the ultimate imposition solution for virtually anyone who prints. Use its powerful imposition tools for printing books, magazine proofs and newsletters. EFI Impose v2.5 will help you to save time and money, eliminating review cycles and expensive layouts.

Job Management

Centralized print job management is simpler than ever.

EFI Command WorkStation® 4.2 Software sets the standard for conveniently supervising and manipulating digital print jobs. This advanced controller interface enables easy queue management and RIP control, letting you manage incoming jobs for release later or for processing as they come in. You can store frequently printed documents right on the server to make reprints a breeze, and change job parameters with the click of a button. The intuitive Command WorkStation's interface guides new users step-by-step through

every job process and provides previews that eliminate guesswork.

Variable Data (FreeForm 2)

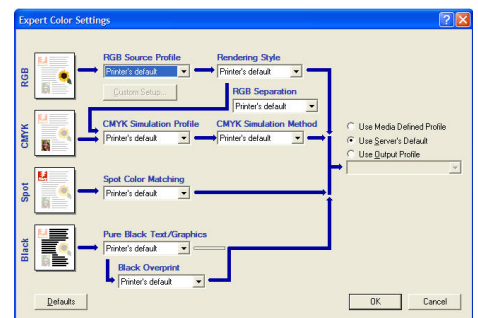

Targeted messaging gets results.

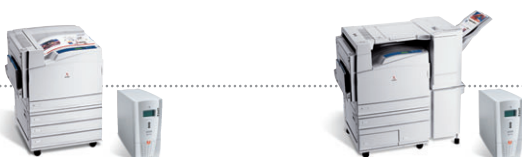

It's been proven that readers respond better to targeted, personalized messages. The Fiery FreeForm™ 2 software's powerful Variable Data Printing solutions enable you to produce customized color output, varying from simple, text-only changes to sophisticated applications containing customized photos and graphics. The extra value and impact you add to your marketing communications will increase response rates, orders, response time, customer retention and profits.

Color Management

Produce predictable, brilliant color right "out of the box."

EFI Fiery ColorWise® 3.0, the latest in color management software, offers built-in intelligence for producing consistently precise colors from all applications, platforms and file formats. Its easy-to-use color adjustments simplify learning for the novice user. For the advanced color professional, Fiery ColorWise provides effortless handling of RGB and CMYK. And EFI Spot-On® color technology allows you to edit and define custom spot colors even after you send your job to the queue. With this unique feature you can edit existing spot color tables or assign a new PANTONE® spot color. Plus, VisualCal™ offers another calibration method — to help you get the colors you want, every time. And the X-Rite Densitometer and EFI Profiler Kit with ES-1000 spectrometer (optional) offer expanded calibration methods.
