

Xerox Nuvera 200/288 EA
Perfecting Production System
Overview

Xerox Nuvera[®] 200/288 EA Perfecting Production System Make a Perfect Impression

More of everything you need to help you grow your business

Take your business to rewarding new levels with the Xerox Nuvera® 200/288 EA Perfecting Production System. This easy-to-use, flexible system is built on a strong foundation of exceptional image quality, speed, efficiency and productivity to get your business growing.

Essential Elements That Deliver For You

The Xerox Nuvera 200/288's foundation comprises essential elements:

- **Incredible, offset-level image quality.** It offers 4800 x 600 dpi and up to 156 lpi, plus the cost and time efficiencies associated with digital.
- **Faster and more RIPs.** An advanced Dual Core Processor plus Parallel Raster Image Processing (RIP) means the Xerox Nuvera 200/288 gets your jobs in and out of the gate in a hurry. Your jobs are processed quickly and in the most efficient way possible.
- **Lightning-quick machine and finishing speeds.** You can complete your jobs in less time than ever before with machine speeds of up to 288 duplexed images per minute. On top of that, finishing speeds are close to machine-rated speeds, so you can complete your jobs quickly.
- **More uptime, more often.** The Xerox Nuvera 200/288 offers Pass Through Programming, which enables you to keep your system up and running even when you're waiting for service. You'll enjoy more uptime, more often, ensuring you are able to meet your deadlines and productivity goals.

The Xerox Nuvera® 200/288 EA Perfecting Production System Offers You Extraordinary Image Quality

The result of today's most progressive monochrome technology, coupled with customer-focused engineering, it relies on revolutionary EA fine particle toner to produce page after page of polished impressions that are comparable to, or exceed, offset-level output for all of your applications.

Since the industry quantifies great imaging in dots per inch (dpi) and lines per inch (lpi), it's important to know the Xerox Nuvera 200/288 has an impressive set of numbers to support the results you'll see, including:

- RIP at 1200 x 1200 dpi
- 4800 x 600 dpi printing
- Halftone screens available at 85, 106, 125, 134 and an unprecedented 156 lpi

These quality facts translate into the phenomenal printed pages you'll produce—through silky grays, pictures that say “this is for real,” and heightened clarity and detail in every line and letter.

Extraordinary Speed, Power and Productivity Keep Your Jobs Moving

The Xerox Nuvera 200/288 features a unique tandem architecture design that enables it to produce 288 (A4/8.5" x 11") duplexed images per minute. This innovative design offers you a straight paper path to support a wide variety of media and facilitates reliable paper handling.

Whatever your environment, the system's Sheet Enhancement Module (SEM) ensures unparalleled sheet flatness. The result? Outstanding stack quality as well as the highest levels of performance from downstream finishing alternatives. And since the print engine has the power to push third-party finishing equipment closer to its rated speed, you will realize true end-to-end productivity with the Xerox Nuvera 200/288.

The Xerox® FreeFlow® Print Server's robust Dual Core Processor is at the heart of the Xerox Nuvera 200/288's hard-driving productivity. It enables you to handle even the most complex jobs with ease and finesse, at incredible RIP speeds. And when you take advantage of the benefits of the parallel RIP feature, the Print Server will automatically channel each job so it is produced in the most efficient way possible.

Along with all this speed, power and productivity, you'll also find versatility. The Xerox Nuvera 200/288 accepts many common data streams in their native language, so what you expect is what you get, no data transformation required. It also has broad media latitude so you can choose from an enormous selection of substrates to create exactly the applications you envision.

Impress all of your audiences with great image quality

There is no substitute for great images—they're the first thing your customers will notice, and they make a lasting impression on you. By combining progressive monochrome technology with customer-focused engineering, the Xerox Nuvera® 200/288 EA Perfecting Production System provides image quality that challenges offset.

1
Excellent image rendition with a wide range of gray levels

2
Even lines with smooth, uniform curves

3
Outstanding detail

4
Dark, uniform blacks

5
Sharp, highly detailed text rendering

6
Fine lines and tints

Innovative EA Toner

Fine particle EA (Emulsion Aggregation) Toner is a key factor in the Xerox Nuvera 200/288's high image quality:

- It produces fine lines with maximum detailing, sharp text, halftones and deep solid blacks.
- Printed pages have a smooth, offset-like matte finish.
- Fine scatter typically associated with monochrome digital printing is transparent, so even the most detailed line work is razor sharp. Images are crisp and clear.
- High yields mean longer production print runs are possible without operator attention or intervention to change toner/developer.
- Friendly to the environment, EA Toner achieves better distribution of smaller particles for higher quality with less toner per page.

More Unattended Run Time Saves You Time

Toner and developer are uniquely combined in a single high-volume container, offering you key benefits:

- **Replace less often**—average yield for each toner bottle is 210,000 prints per cartridge.
- **Maximum unattended run time**—each Xerox Nuvera system is equipped with a toner reservoir that holds enough toner for another 2,500 prints after the bottle is empty—allowing plenty of time to change-while-you-run.
- **More uptime**—change-while-run.

You'll Get Excellent Resolution in a Clean Environment

The Xerox Nuvera 200/288 offers you the highest monochrome resolution of any digital production printing system currently available.

- RIPs at 1200 x 1200 dots per inch (dpi)
- 4,800 x 600 dpi printing
- Halftone screens available at 85, 106, 125, 134 and 156 lines per inch (lpi) ensure smooth grays, more realistic pictures and sharper details
- Unique Cyclone Cleaning Technology automatically removes stray toner, paper dust and particles, creating a pristine environment for consistently sharp text, images and photos

TELER Registration Keeps Sheets in Place

You'll achieve superior process and cross process registration of +/- .65 mm for sheet sizes 8.5" x 11" and A4, which meets or exceeds general publishing standards. Our TELER registration (Translating Electronic Registration) precisely controls the position of each sheet of paper according to the image on the photoreceptor, and the speed of each sheet traveling through the paper path. In this way, it ensures each sheet is in exactly the right position to receive the latent image to deliver impressive results.

Simplify Unique Registration Applications

The Xerox Nuvera® 200/288 EA Perfecting Production System also enables customized, independent Side-1 and Side-2 registration for your most unique applications. Custom registration parameters can be established for a specific stock, then stored within the system's stock library for quick recall. This increases your productivity for even your most advanced applications.

Media to Match Your Applications

You can choose from an expansive range of substrates to match your application requirements and build your application capabilities, even oversized coated papers. Expect consistently high image quality on popular coated and uncoated stocks, including bond, bristol, cover, index, offset, recycled, transparencies, carbonless, labels, tabs and preprinted forms.

Optimal Sheet Flatness Anywhere You Are

Optimally flat sheets, delivered by our slim, automated Sheet Enhancement Module (SEM), yield flatter sheets with less curl for smoother print runs, regardless of your production print environment:

- Stack quality is optimized, ensuring high performance from your downstream finishing alternatives.
- Your operators can fine-tune automated controls or access a “manual override” function to overcompensate when proactively fighting heat and humidity in your print production environment. This ensures you achieve optimal sheet flatness.
- This functionality works in conjunction with the stock library to automatically adjust to the characteristics of the paper you are running.

Reliably Productive For You

We offer these options to ensure you enjoy maximum uptime from your Xerox Nuvera 200/288.

Direct Communication to Service

Xerox Nuvera 200/288 are intelligent systems that can connect to your network and report service issues as they happen. This information ultimately is sent to your Customer Service Engineer's (CSE) PDA device. Your CSE is made aware of your problem before arriving at your site. This means that they arrive prepared with the appropriate parts, reducing delays in production and maximizing your uptime.

Xerox Nuvera Productivity Plus (XPP) Integrated Maintenance Program

Xerox Nuvera Productivity Plus (XPP) is an innovative, customer-focused maintenance program that makes it easy for you to diagnose and replace routine service items. A series of wizards provide step-by-step instructions to replace basic parts. It enables you to increase your productivity and print volumes, while effectively managing print quality—all while avoiding service intervention across every shift. Two program options are available—XPP Basic and XPP Advanced. You can choose which is best for you based on the level of participation that works for your business.

Xerox® prInteractSM Remote Service Offerings

Remote service features including Automated Remote Monitoring and On Demand Machine Data Transfer available through a secure, online connection between Xerox engineering staff and your Xerox Nuvera EA. Using this connection, we can quickly respond to your service needs, enabling us to:

- Easily access equipment data to provide real-time recommendations and help optimize overall performance
- Automatically generate up-to-the-day accurate meter reads with MeterAssistant™

“The capacities and duty cycles of these machines are impressive. Xerox recommends monthly page volume from 1.0 million to 1.5 million pages per month for the Nuvera 100 and 120, and 2.0 million for the Nuvera 144. The company claims these models' duty cycle tops out at 4.3 million pages per month for the Production System and 6 million and 7.8 million pages for the 200 and 288 Perfecting Production System models, respectively. While few users need near that capacity, Xerox is making a statement about its faith in the durability of these machines.”

Courtesy Better Buys for Business

You'll have the power of 2, with the simplicity of 1

You'll benefit from having the power and productivity of two print engines in one space-saving footprint with the Xerox Nuvera® 200/288 EA Perfecting Production System. This unique tandem architecture design gives you more—speed, uptime, performance and overall end-to-end productivity—so you can do more with your business.

You'll Get Results Twice as Fast With Tandem Architecture

The Xerox Nuvera 200/288 can produce 200 to 288 (A4/8.5"x11") duplexed impressions per minute because of its unique tandem architecture design. Although this comprises two print engines working closely together, the engines actually function differently together than they would if they were used independently.

- When printing in the duplex mode, both engines are used at full speed (100/144 A4, 8.5" x 11" pages per minute). Each prints one side of a two-sided document, creating a straight path that results in a net speed of 288 duplexed images per minute.
- When printing in the simplex mode, the system runs at 100/144 pages or impressions per minute.

Closed loop process ensures top performance for you

Optimum performance is ensured by a closed loop process which continuously scans printing activities to monitor and maintain both print quality and registration.

- Advanced image balancing software assures consistent image quality at all times.
- The Xerox Nuvera 200/288's entire paper path, including both the print engines and all accessory components, is designed to provide operators complete access, at any time, for simple jam clearance with full job recovery.

The Productivity Advantage Comparison	
Normal Production (no service required)	Pending Service (% of productivity pending service)
Traditional Production Devices 100%	0%
Xerox Nuvera 200/288 EA Perfecting Production System (Pass Through Programming) 100% – 200/288 ipm	50% – 100/144 ipm Simplex or Duplex

You'll appreciate a smarter approach to paper handling

Xerox® SmartPress™ PLUS Paper Handling works in conjunction with the FreeFlow® Print Server's onboard stock library and the Xerox Nuvera 200/288's straight duplex paper path to accommodate a greater variety of media. It is in constant communication with paper handling vacuums and rollers, much like a fuel engine where the pistons work together to provide maximum power and full job recovery.

You Can Do More, More Often With Pass Through Programming

Pass Through Programming technology lets you convert traditional downtime into bonus uptime in a variety of situations by enabling jobs to continue printing at 100/144 images per minute until our service arrives.

For example, when either of the two print engines requires a soft shutdown, your operators can select "Pass Through Mode." All pages are then imaged by the assigned primary print engine and simply pass through the idle print engine.

Your Business Moves Faster With Our Dual Core Processor

Your productivity is enhanced from the start with the Xerox Nuvera® 200/288 EA Perfecting Production System because the FreeFlow® Print Server front end offers a robust Dual Core Processor that more than exceeds the needs of most customers. It provides exceptional RIP speed to easily handle even your most complex jobs; for example, those jobs typically associated with variable data and high resolution images. If you are working in a uniquely aggressive environment where the application set is consistently dominated by complex jobs containing extraordinarily large amounts of high end graphics and variable images, you also have the option to choose a second Dual Core Processor.

Parallel RIP For Your Most Challenging Jobs

Parallel RIP consists of a set of Xerox® proprietary software which leverages multiple processors, memory and software controls to boost image processing performance and print speed beyond traditional boundaries. It is ideal for long jobs with many non-repeating scanned images or digital photographs; these include text books, magazines, yearbooks and product manuals. It is also best for complex jobs with low run lengths, proofing and test prints.

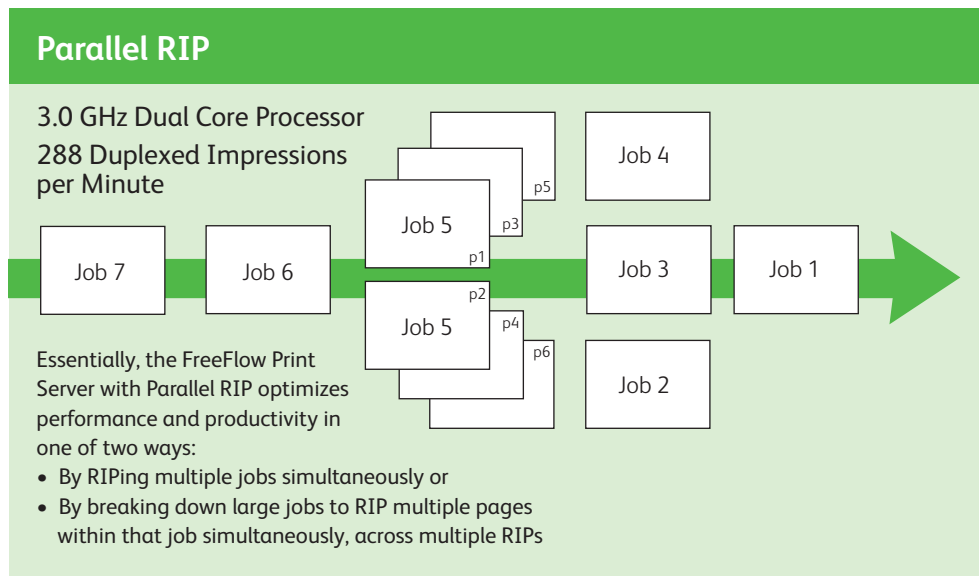

How does Parallel RIP work?

When selected, the FreeFlow Print Server will intuitively manage the jobs you have submitted for Parallel RIP for optimal performance.

- The Print Server may determine it is best to have a job processed on a single RIP, which will likely leave one or more of your remaining RIPs open for the next job or jobs.
- Or a large job can be split into sections that will be processed in parallel (simultaneously) using all of your available RIPs to complete it as quickly as possible.

How many RIPs can you have?

While the maximum number of RIPs varies depending on the processor and memory configuration of your Xerox Nuvera 200/288, as a rule, approximately two to three RIPs will run on one Dual Core Processor. If you choose to add an optional second Dual Core Processor, you can potentially have up to five RIPs working together. (LCDS, IPDS and PCL data streams are not further enhanced via Parallel RIP.)

How the FreeFlow® Print Server benefits your business

You'll enjoy powerful job control plus time savings in every environment with the Xerox® FreeFlow Print Server. Integrated right in the Xerox Nuvera® 200/288 EA Perfecting Production System, this print server enhances your business's productivity, effectiveness and, ultimately, its profitability in many vital ways.

A Wide Range of Features Put You In Control of Every Job

The FreeFlow Print Server delivers important benefits for your business. For example:

- Receive/RIP/print jobs concurrently to efficiently produce hundreds of small jobs or transactional data jobs with thousands of customer database entries.
- Print and re-print on-demand with simple controls to preview, edit, impose, proof, interrupt, reprogram and forward jobs.
- Advanced security controls allow individual or group settings.
- Submit jobs from just about anywhere, including desktop/commercial publishing workflows. Submit data from mainframe systems, client/server architectures, XML/database/ASCII input, or simply submit data from DVDs, CDs and even portable USB devices.
- Submit print-ready jobs into pre-set Hot Folders for easy, automatic printing.
- Automate job ticketing and customize job workflows through up to 250 programmable queues with minimal operator intervention.
- Use the stock library to promote efficient use of media. The Sheet Enhancement Module automatically adjusts performance based on stock selected.
- Save on training costs and increase uptime—easy-to-use graphical user interface (GUI) and workflow lend themselves to the “train once” paradigm.
- Ideal for both publishing (high imaging quality and speed) and transactional environments—simultaneously accommodates an impressive variety of common data streams natively, including Adobe PostScript®, PCL, PDF, TIFF, ASCII, IPDS and LCDS, and variable data formats such as FreeFlow VI Interpreter (VIPP®), PPML, IPDS and LCDS.
- Add optional memory and hard drive to increase the Xerox Nuvera 200/288's overall performance and your ability to store more job data on the server.

A Smooth Workflow: Easier For Your Business, Easier For You

The Xerox FreeFlow Digital Workflow Collection is designed to take you easily through every stage of managing your jobs, from creation to final output. Integrating with the Xerox Nuvera 200/288, this suite of optional solutions enables you to enhance, automate and simplify your existing workflow, increasing productivity and making the most of your investment.

Keeping You Stocked and Running—Automatically

With the Automatic Supplies Replenishment option on your Xerox Nuvera 200/288, the print engine will automatically call in your supplies order for you, as you need it. Available as part of your service contract, our “smarter” Xerox Nuvera 200/288 system has the intelligence to calculate when a certain number of pixels printed has been reached, and then sends a signal via your network to Xerox to order more crucial replacement items. We make sure you have on-hand what you need to keep running, increasing your productivity and helping you focus on running your business.

Xerox Nuvera® 200/288 EA Perfecting Production System with Roll Feed, FreeFlow® Print Server, Enhanced Line Screens, Inline Stacking, Finishing Transport and Book Factory

FreeFlow option	Function	What it does for you
FreeFlow Web Services	24/7 Web portal connecting your print shop to your customers	From anywhere, your customers can submit new jobs securely and reorder existing ones over the Internet (or an intranet).
FreeFlow Process Manager	Automates your print shop's common prepress steps	In addition to a touchless workflow, you can process more jobs faster, for less and maximize your printers.
FreeFlow Output Manager	Automates load balancing and job scheduling	You can automate your application production and enhance efficiency.
FreeFlow Makeready® and Scanner 665	Optimizes document assembly processes; can blend hard copy with digital	Gets your input ready for printing and archiving; facilitates easy retrieval.
FreeFlow Variable Information Suite	Enhance transactional or marketing materials with personalization and/or security features	Get a better return on your investment with TransPromo pieces; ensure security for your valued documents.
FreeFlow Express to Print	Intuitive visual interface simplifies job ticketing and prepress functions while template-based automation streamlines job setup	Cost-effectively increase your productivity, even on cumbersome jobs like business cards, books and manuals.

Features that fit your business

The Xerox Nuvera® 200/288 EA Perfecting Production System offers a comprehensive set of features to meet the needs of your business, your environment and your customers. From feeding to finishing, it's a system that's all about helping you to accomplish what matters most to you—and enabling your success.

From Feeding to Finishing

The Xerox Nuvera® 200/288 offers a complete set of features that enable your success.

1

Paper Handling Gets You Off To a Great Start

The Xerox Nuvera 200/288 offers you excellent paper handling:

- Paper trays rely on air shuttle feed technology. Processor-controlled, using information from the stock library, this technology ensures reliable feeding and supports heavier media and coated paper. Air knives separate paper to avoid misfeeds.
- The system “tells” rollers when to press harder, when the air knives should add thrust, and more, to deliver a highly intuitive and productive paper-handling process.
- The straight duplex paper path ensures ultra-reliable paper handling for duplex production printing and it's easily accessible to your operators.
- You can reload paper without job interruption to significantly increase continuous productivity.

Choose from the following Sheet-feed modules. Maximize your Sheet-feed capability by combining any three modules to suit your workflow:

Standard Sheet-feed Module

- Four trays, 5,800-sheet capacity
- Do more high-value applications with more unattended run time, at point of need and produce high-impact jobs on demand

Oversized High Capacity Sheet-feed Module

- Two oversize trays, 3,200-sheet capacity
- Ideal alternative if you want to leverage oversize stocks—now runs sheets up to 12.6" x 19.3"—ideal with four-up book block printing

Note: When you add up to three of the above modules in any combination to your configuration, you will enable up to a 17,400 sheet capacity with as many as 12 pick points to support long print runs and complex, multistock production runs.

DocuSheeter™ NV Roll Feeder with Optional Grain Rotator

- Attaches to a standard Sheet-feed Module
- Can provide paper cost savings, reduce operator intervention and add up to five hours of continuous feed in a production print environment while still providing access to the paper trays for multiple pick points

2

You'll Get Best Results With Exceptional Imaging and Powerful Processing

The powerful Xerox® FreeFlow® Print Server is integrated right into the Xerox Nuvera® 200/288 EA Perfecting Production System, providing you with powerful job control and time-saving efficiency in your Publishing, Transactional and TransPromo environments. You'll enjoy feature benefits such as:

- Efficient queue management up to 250
- Integration with a robust stock library
- Imposition software
- Enhanced line screen capability (available in 85, 106, 125, 134 and 156 lpi)
- Sophisticated variable data capabilities—including native printing of Xerox FreeFlow VI Suite output. Other variable data streams are also supported

The easy-to-use Graphical User Interface (GUI) allows your operators to easily manage multiple print jobs from multiple queues. From the interface, you can hold, interrupt, proof, reprogram and forward jobs to maximize print engine productivity.

Using the Page Exception Program, your operators can incorporate multiple stocks or inserts throughout your application.

3

Add Value To Your Output With Inserting

You can add value and impact to your output by inserting color covers, preprinted inserts or specialty media with our Post-print Paper Insertion Modules:

Insertion Module

- Four trays, 5,800-sheet capacity

Oversized High Capacity Insertion Module

- Two trays, 3,200 oversized sheets

Note: This option can provide an overall system total of up to 16 pick points and 23,200 sheet capacity (three Sheet-feed Modules and one Insertion Module)

Insertion can be integrated so you can simply load preprinted stock and run your job.

4

You Can Count On a Professional Finish

Choose from a wide variety of in-line and off-line professional finishing options, both from us and from our industry-leading third-party suppliers. These options are designed to accommodate your production requirements, taking on everything from complex documents to challenging environments.

A perfect finish for every job you do

Finishing can make or break your applications. The Xerox Nuvera® 200/288 EA Perfecting Production System offers you many ways to finish your output—and to create high-quality, high-impact applications right at your point of need.

Our Partners Offer You the Best Finishing in the Business

We offer you the finishing options you need to wrap up your jobs professionally. From booklet makers and perfect binders to inserters, stackers, stitchers, spiral binders and more, we partner with the makers of today's best finishing devices and equipment. These include recognized industry leaders such as C.P. Bourg, Plockmatic, GBC and others.

For Example, You Can Choose From the Following:

Basic Finisher Module

- For production print environments
- Capabilities include in-line stapling and stacking up to 3,000 sheets

Basic Finisher Module Plus

Offers all of the benefits of the Basic Finisher Module, plus:

- Convenient side exit lets you integrate basic in-line finishing with other finishing equipment

- Together with the Basic Finisher Module, enables standalone dual finishers that stack up to 6,000 sheets and delivers unload-while-run finishing capability, ensuring greater throughput without interruption
- Can be used in tandem, enabling you to integrate two Basic Finisher Modules Plus for even greater capacity with other in-line finishing alternatives

Basic Finisher Module—Direct Connect (BFM-DC)

Offers all the benefits of, and works seamlessly with, the Basic Finisher Module Plus along with the added benefit of onboard Document Finishing Architecture (DFA), which provides an interface to alternative in-line finishing. The BFM-DC provides direct connection to center-registered finishing devices such as the Xerox® Tape Binder, C.P. Bourg PowerSquare™ 200, CEM DocuConverter™ and more.

- **Alternating Set Mode for systems with Dual Basic Finisher Modules**—This mode alternates the destination of small job sets between two stackers. While one set is completing the other is starting, simultaneously, eliminating wait times and increasing productivity.

Latest Additions to In-line Finishing Options

Dual Xerox Tape Binder

- Fully automated tape binding to quickly and easily assemble and bind tamper-resistant books

- Economical solution for books/manuals with short life expectancy
- Tape color options are black, white and dark blue for books. A tab option allows you to insert tabs to define sections in your tape-bound books
- Use in-line with Basic Finisher Module—Direct Connect with standard stapling features or DS3500 Stacker for stacking along with other third-party finishing alternatives
- Now available in dual Xerox Tape Binder configuration for added productivity
- Available in either 8.5" x 11" or A4 models, easily produce bound books and manuals from 15 – 125 sheets (20 lb bond/75 gsm)

Duplo DBM-5001

- Works in-line with the Xerox Nuvera® for a complete, full-bleed printing and booklet making system that is perfect for a wide range of on-demand applications
- Easy to use with state-of-the-art accumulation system, Hohner stitcher heads, push-button setup and push-button changeover
- Standard, heavy-duty Hohner stitcher heads provide reliable continuous production
- Four-head stitch option lets you produce booklets two-up on a single sheet
- Allows great flexibility and convenience for both long and short runs and reprints
- Handles weights from 80 gsm to 300 gsm and sheet sizes 4.7" x 6.7" (120 x 170 mm) to 14.01" x 19.7" (356 x 500 mm)

Every application opportunity is your opportunity

There are many ways you can bring together the outstanding features the Xerox Nuvera® 200/288 EA Perfecting Production System offers you. We've made them modular, so your choices are plentiful—and they're all yours. What's most important is that you have the freedom to create a system specially designed to meet the specific needs of you and your customers and to make your business thrive.

1. Feeding

2. Imaging & Processing

¹Roll feeder solution requires configuration with Standard Sheet-feed Modules.

Just The Way You Want It

From transactional and transactional promotional (TransPromo) applications to book publishing to technical manuals and more, the Xerox Nuvera 200/288 makes it easy for you to add value and deliver results for your customers. You'll have limitless opportunities to develop and create new and enhanced applications that will expand your business. It offers the high image quality, speed and productivity needed to make the most of every application.

Achieve Better Response Rates For Your Transactional Pieces

Because the Xerox Nuvera 200/288 simultaneously accommodates a wide range of common datastreams natively, it can easily produce all of your transactional applications. Target your highest-value customers with pertinent upsell and cross-sell messages every month. And move lower-value customers to a place of greater loyalty, frequency and purchase volume.

Increase Your Return On Investment With TransPromo

You'll get a better return on your investment with TransPromo pieces. The Xerox Nuvera 200/288 lets you turn your standard transactional applications into cost-effective sales tools—it's easy to add personalized graphics, promotional offers and marketing content. And you'll save on print and postal costs.

You'll Find The Book Opportunity Easy To Read

With the Xerox Nuvera® 200/288 EA Perfecting Production System, you are well prepared to succeed printing books and manuals—we offer the right business model, the right workflow tools and experience and the right technology to ensure your success in the growing digital book printing business. An excellent complement to offset, this system enables you to deliver the look and feel authors, publishers and readers demand with high imaging quality and an offset-like matte finish.

3. Inserting

4. Finishing

²Available "Dual" finishing combinations (not shown):

- (1) Basic Finisher Module Plus and (1) Basic Finisher Module;
- (2) Basic Finisher Module Plus and (1) Xerox DS3500 Stacker;
- (1) Basic Finisher Module Plus and (1) Basic Finisher Module-Direct Connect with other in-line center-registered finishing solutions;
- (1) Basic Finisher Module Plus and (2) Xerox DS3500 Stackers;
- (1) Basic Finisher Module Plus and (1) Xerox DS3500 Stacker;
- (1) Xerox DS3500 Stacker and (optional 3rd party);
- (2) Xerox DS3500 Stackers and (optional 3rd party).

Drive Your Business Ahead

The Xerox Nuvera® 200/288 EA Perfecting Production System delivers the advanced productivity you need to propel your business ahead of your expectations and ahead of the competition.
