U.S. Cost Per Page

Xerox Office Color Products

Xerox Print Costs vs. Competition

The tables below list the cost per page (CPP) for Xerox office printers using the industry standard measurements of 5% black coverage (a normal black-and-white text page) and 20% cyan-magenta-yellow-black coverage (a normal color page).

Print Cartridge or Ink Only¹

- Cost per page based only on print cartridges or print cartridge equivalents
- More accurate for low-volume users who may never need to replace any long-life consumables, such as fusers, transfer belts or maintenance kits

All Consumables²

- Cost per page based on all consumables, including fusers, transfer belts or maintenance kits
- More accurate for high-volume users who may need to replace long-life consumables

Many competitors publish cost-per-page values based ONLY on print cartridge or ink use rather than on all consumables. Xerox lists both sets of costs so that you can accurately compare products.

Definition: A print cartridge is a supply item that contains both toner and an imaging unit.
