

Xerox® Office Multifunctions Print Costs

U.S. Cost Per Page

The tables below list the cost per page* (CPP) for Xerox office multifunction devices.

Many competitors publish cost-per-page values based ONLY on print cartridge or ink use rather than on all consumables. Xerox lists both sets of costs so that you can accurately compare products.

¹ Costs are based on web price; published yields; and print cartridge, ink, or print cartridge equivalents (toner cartridge plus imaging unit). These values are more accurate for low-volume users who may never need to replace any long-life consumables, such as fusers, transfer belts or maintenance kits.

² Costs are based on web price, published yields, and all printer consumables (may include fusers, transfer belts or maintenance kits). These values are more accurate for high-volume users who may need to replace long-life consumables. Actual costs can approach but never reach the values listed.
