### Xerox® Mobile Express Driver®
Makes it easy for mobile users to find, use and manage Xerox® and non-Xerox devices in every new location. Plug into a new network and Mobile Express Driver automatically discovers available printers and provides status and capability information. Save a list of “favorite” printers for each location, store application print settings for use on any printer in any network, and greatly reduce mobile support calls to IT.

### Xerox® Global Print Driver®
A truly universal print driver that lets IT administrators install, upgrade and manage Xerox® and non-Xerox devices from a single driver. It provides a consistent, easy-to-use interface for end-users, reducing the number of support calls, and simplifying print services management.

## Print Solutions
### Xerox® Mobile Print Cloud (Optional)
Xerox® Mobile Print Cloud addresses the needs of businesses with a mobile workforce and puts you ahead of the evolving mobile print need, but without burdening staff, budget or infrastructure. Getting started takes only a few minutes via the cloud. Print from any mobile device to nearly any brand of printer. Accurate printing with true Microsoft® Office® rendering and more. Print what you need, when, where and how you need it.

### Xerox® Mobile Print Solution (Optional)
Xerox® Mobile Print Solution is an ideal choice for sites that have additional requirements for control and security with an onsite server. Xerox® Mobile Print Solution allows users to print from most mobile devices to nearly any brand of printer or multifunction printer without drivers or added complexity. Simply enter a release code (PIN) at the device and get accurate printing with true Microsoft Office rendering and more to use with your server for private, onsite deployment.

Features

• Job-based Calibration Integration
  – Fiery Spot-On finds the best match of PANTONE®, PANTONE Series, RGB, CMYK, L*a*b* and Spot Colors
  – Color Modes for professional proofing and enhanced production color requirements
  – Maximum print density
• Fiery Graphic Arts Package, Premium Edition (optional) provides expert tools for preflighting and troubleshooting jobs
• Fiery Color Profiler Suite (optional) creates, verifies and edits color profiles with a single profiling solution
• Fiery technology increases your profits by delivering high-impact documents with vibrant images and color that exceed your customers’ expectations and also meets tight turnaround times and allows you to do more work by automating manual tasks and removing bottlenecks that slow down production.
• With Fiery technology, you can produce effective marketing pieces with the widest range of output options, including automatic identification of job elements such as text, images and spot colors. This feature also eliminates the need to re-program jobs, making the process simple and quick. It is ideal for producing powerful marketing materials, personalized communications and packaging and photo publishing applications.
• Fiery ColorWise gives high-quality color out-of-the-box and integrates the essential components of Fiery Graphic Arts Package, Premium Edition, Fiery Spot-On and the Fiery Color Profiler Suite to control and manage color throughout your workflow.
• The Fiery Command WorkStation increases your production and reduces errors and waste by centralizing job management via its intuitive user interface.
• Simplify your labor-intensive document composition and imposition tasks even more by using Fiery SeeQuence Impose and Compose’s intuitive interface.
• Fiery JDF technology connects EFI solutions and Fiery-enabled solutions, so you can move job information through your system faster and more efficiently. By supporting the Adobe PDF Print Engine, Fiery servers also offer a native end-to-end PDF workflow, therefore improving the consistency and flexibility of your printed output from design to print.
• Using Fiery servers and Fiery Command Workstation, you get a new level of integration for process and profit improvement, including seamless connectivity to Xerox® FreeFlow® for workflow automation.
