

Keep it Simple

Helping you simplify and improve your office environment

Changes in information technology can be as daunting for an IT department as they are for an end user. Recognizing the importance of usability and easy access for both you and your customers, we focus on building product solutions that are easy to implement and manage across your organization.

Expanding your sourcing solutions

We want to help you solve problems as quickly and easily as possible. Whether you're a small business needing to lease a few multifunction devices, a medium-size business or a large global enterprise, we're ready to partner with you.

Our seasoned consultants can recommend products and services — including integrated third-party solutions — that best meet your needs. Our worldwide reseller network, comprising some of the world's largest reseller organizations, offers in-depth consultation services for addressing critical IT challenges. We also maintain a direct online resource at Xerox.com, from where you can conduct your own research to select your perfect solution.

Simplifying your workload

We help optimize your printing environment to keep it running smoothly and in sync with the rest of your network. Our integration tools are among the best in the industry:

- Device cloning for ease of implementation
- RSS feeds for security updates to minimize risk of network encroachment
- Regularly updated software patches
- LDAP integration with Active Directory

We also offer complete fleet management solutions through Xerox Office Services and Xerox Device Agent, which manages everything from remote diagnostics to toner refills. We can host these services on either your site or ours.

Accessible, flexible technology

We help simplify how people use our technology. Our multifunction devices have an easy, intuitive user interface that is consistent throughout our black-and-white and color product lines. Print drivers provide visual feedback as job selections are made, and our touch screens put the most commonly used features on the main screen to help complete most jobs with minimal navigation.

Xerox Extensible Interface Platform (EIP) turns complicated document workflows into simple processes. You can easily transform hard copy documents into digital files through a personalized interface, or gain access to critical business documents without leaving the device. EIP revolutionizes the way you work by streamlining your everyday document workflows.

Easy to implement

Our installation, training, project management and application development services make incorporating new products and processes easy for everyone. Our skilled business professionals are experts in new technology and in keeping work streams simple.

Simplify your life with Managed Solutions

Many of our customers rely on us not only to come up with great technology ideas, but to manage this technology as well. We offer a fully integrated portfolio of consulting and outsourcing services that can be tailored to your business needs. Let Xerox take care of your solutions, so you can spend time focusing on your core business.

Xerox Global Services™

When you want a full set of capabilities without having to manage the technology, contact Xerox Global Services. With more than 15,000 service professionals, consultants, systems integrators and process engineers in 160 countries, Xerox Global Services can effectively oversee your solution. Using methodologies such as Lean Six Sigma and enterprise-wide assessments, we can improve your business measurably.

Business Process Services

Simplify your document-driven processes through digital imaging, archiving and indexing services — making information easier to manage and easier to find.

Office Services

Xerox Office Services can manage your IT helpdesk, assets, technology procurement — even your in-house print/copy centers.

Document Outsourcing and Communication Services

Our creative, customer communication, document publishing, and mail and distribution services help you get important communications into your customers' hands, quickly and effectively.

Services and support

If finding the right products, training and service are challenges in your business, we can help. We have the people, technology, services, supplies and support to help your business grow. We will assess your organization to uncover areas where you can simplify how you work, and provide strategic recommendations to enable your business to run more efficiently.
