# PDL Reference Guide for the WorkCentre 7328/7335/7345 & WorkCentre 7232/7242

# **Accessing Extended Features**

#### Overview

This document enables you to access the extended features of the WorkCentre 7328/7335/7345 and WorkCentre 7232/7242 in environments that do not have a custom print driver.

**Note:** The commands and syntax used in this document requires familiarity with either PostScript (PS) or Printer Command Language (PCL).

This document provides the Printer Description Language (PDL) commands and syntax for each feature. The following items are also included:

- A PCL table that describes the PCL features the WorkCentre supports and the syntax to use the feature.
- A PS table that describes the PS features the WorkCentre supports and the syntax to use the feature.

This document is not intended to be a complete PS or PCL reference manual. It is a guide for using the PS and PCL commands with both the WorkCentre 7328/7335/7345 and WorkCentre 7232/7242 products. Refer to these sources for additional PS and PCL information:

- PostScript Language Reference Manual, Third Edition, ISBN 0-201-38922-8,
- PCL5 Printer Language Technical Reference Manual (http://h20000.www2.hp.com/bc/docs/support/SupportManual/bpl13210/bpl13210.pdf),
- Printer Job Language Technical Reference Manual
   (http://h20000.www2.hp.com/bc/docs/support/SupportManual/bpl13208/bpl13208.pdf), a

   Hewlett-Packard manual.

This document applies to the stated Xerox products. It is assumed that your device is equipped with the appropriate option(s) to support the information within this document.

dc07cc0430

# Using this Guide

Search the Feature Table to determine whether the feature you wish to use is supported.

Verify that the feature is supported by the platform. For example, the WorkCentre must have an optional finisher installed to use stapling commands.

Follow across the table to find the syntax listed for the PDL examples shown. Reference the "Dependencies/Caveats" section when working with PS and/or PCL commands.

# **PCL**

This WorkCentre supports PCL5e and PCL XL Color emulations that enable the features listed in the following table.

Feature	Description	
Job Name	The value for Job Name is stored for printing on the banner page.	
Custom Paper Size –	Customer designated paper size on which to print a job.	
available only for PCL		
Media Size	The size of media on which to print a job.	
Media Source	Specifies the tray to supply the job's media.	
Output Location	Indicates the output bin where the completed print job is sent.	
Stapling	Indicates use and location of staple(s).	
Punch	Indicates use, location, and number of hole punches.	
Booklet	Print job in booklet format.	
Collation	Collated creates a set that includes 1 copy of each page. Uncollated	
Resolution	creates a stack of multiple copies of the same page.	
	Resolution used to image a job.	
Quantity	Number of copies of a job to print.	
Simplex	Delivers one-sided output.	
Duplex	Delivers two-sided output.	
Orientation	Delivers output in landscape or portrait orientation.	
Force Short Edge	Rotates orientation of job.	
Feeding	Consider Chara (Consuma) to held the print inheat the device with it is released	
Job Type	Specify Store (Secure) to hold the print job at the device until it is released by input at the local UI (see documentation shipped with the device for	
	more information), or Proof to print the first of multiple copies to check that	
	all attributes of a job are correct.	
Interleaving Paper	Insert blank media to separate sheets of transparent media.	
(transparency	·	
separator)		
Job Based	Allows entry of an accounting code and user ID. To enable this feature the	
Accounting	optional Network Accounting kit is required.	
Delayed Print	Specify the time to print a job.	
Banner Sheet	Turns on/off the banner sheet that prints at the beginning of every job.	
Unicode Printing	This product supports PCL Unicode printing with the installation of Unicode	
	3.0 fonts on the hard disk. Fonts must be installed using the device's web	
	page. Within the device's web page Font Management can be found by	
	clicking on:	
	[Properties Tab] → [Services] → [Printing] → [Language Emulations]	
	→ [PCL]. The Font Management section can be found at the bottom of the	
	page.	

dc07cc0430

# PCL/PJL Implementation

The following table contains the PCL feature commands and shows the syntax required to use the feature. After the table are examples of how to use these commands and examples of a PCL file.

Feature	Implementation	Values	
Job Name	PJL SET JOBNAME =	Where jobname-string is a maximum of 32 characters	
	"jobname-string"	Do not use " (22 hex) character	
Custom	<esc>&amp;I101A</esc>	Width of Custom Paper is specified by	
Paper Size –		<esc>&amp;f#I</esc>	
available only		where # represents decipoints between 100 - 305 mm.	
for PCL		· · · · · · · · · · · · · · · · · · ·	
		Length of Custom Paper is specified by <esc>&amp;f#J</esc>	
		where # represents decipoints between 140 – 482 mm.	
		For example, 4.25-inch x 5.5-inch paper appears as: <esc>&amp;f3060l3960J</esc>	
		4.25-inch x 720 decipoints/inch = 3060	
		and 5.5-inch x 720 decipoints/inch = 3960.	
Media Size	@PJL SET PAPER = value	Where <i>value</i> is one of the following:	
Wicala Olzc	© 1 DE DETT AT ER = Value	Where value is one of the following.	
		A3 12 x 18	
		A4 LEGAL: 8.5x14	
		A5 JISEXEC: 8.5x13	
		A6 LETTER: 8.5x11	
		JISB4 8x10	
		JISB5 Executive : 7.25 x 10.5	
		JISB6 Statement : 5.5 x 8.5	
		LEDGER: 11x17 CUSTOM: Custom paper	
		11 x 15	
	<esc>&amp;I int A</esc>	Where int is one of the following:	
		2: Letter (8.5x11) 45: B5 (JIS)	
		3: Legal (8.5x14) 46: B4(JIS)	
		6: Ledger (11x17) 101: Custom	
		13:A5 102:A6	
		26: A4 103: B6 (JIS)	
		27: A3 104: Statement (5.5 x 8.5)	
		40: 8.5 x 13 135: 8x10	
Media Source	@PJL SET	Where <i>value</i> is one of the following:	
	MEDIASOURCE = value	TRAY1: Feed from paper tray 1	
		TRAY2: Feed from paper tray 2	
		TRAY3: Feed from paper tray 3	
		TRAY4: Feed from paper tray 4 (7328/7335/7345 Only)	
		TRAY5: SMH	
	<esc>&amp;I int H</esc>	Where int is one of the following:	
		0: Feed paper from default tray	
		4: Tray1	
		1: Tray2	
		5: Tray3	
		8: Tray4 (7328/7335/7345 Only)	
		20 = Auto	
		2 or 3 = bypass tray	

dc07cc0430

Feature	Implementation	Values
Output	@PJL SET OUTBIN =	Where value is one of the following:
Location	value	UPPER: Main tray
		MAINTRAY: Main tray (no finisher installed)
		LOWER: Side tray
		SIDETRAY: Side tray
		-
		OUTBIN101 Finisher Tray (7232/7242 only)
		MAINTRAY3: Top tray of Advanced Office and Professional Finishers (7328/7335/7345 only)
		OUTBIN101: Finisher tray (w/ B-Finisher or C-Finisher) (7328/7335/7345 only)
		BOOKLETTRAY: Booklet tray of Professional Finisher
		with booklet module (7328/7335/7345 only)
	<esc>&amp;I int G</esc>	Where <i>int</i> is one of the following:
	120074111110	0: Automatic selection
		1: Main tray
		2: Side tray
		6: Finisher tray (applies to all finishers)
Stapling	@PJL SET STAPLE =	Where <i>value</i> is one of the following:
	value	TOPDUAL
		TOPLET
		TOPRIGHT BOTTOMDUAL
		BOTTOMBOAL
		BOTTOMRIGHT
		LEFTDUAL
		RIGHTDUAL
		SADDLE
		TOPQUAD
		BOTTOMQUAD
		LEFTQUAD
		RIGHTQUAD Don't see in PCL6 Driver.
		NONE
Punch	@PJL SET PUNCH =	Where <i>value1</i> is one of the following:
(7328/7335/	value1	TOP
7345 only)		RIGHT
		LEFT
	00 11 000 100 1	BOTTOM
	@PJL SET JOBATTR =	NONE
Folding	"@PNHN = value2"  @PJL SET JOBATTR =	Where <i>value2</i> is TWO: 2 holes Where <i>value1</i> is one of the following:
(7328/7335/	"@FOLD = <i>value1</i> "	
7345 only)	C. CLD - Value	BIFOLDINSIDE: Bi-fold single page
Collation	@DIL SET OTV - int	BIFOLDMULTIOUTSIDE: Bi-fold multi-page Where int is: 1-999 sets of collated documents.
Resolution	@PJL SET QTY = int  @PJL SET RESOLUTION	Where <i>value</i> is
Nesolulion	= value	600
	7 3.30	1200 (7328/7335/7345 only)
Bits Per Pixel	@PJL SET BITSPERPIXEL	Where <i>value</i> is 1: 1 bit per pixel (per plane)
	= value	1 1 4 - 1 - 7
Quantity	@PJL SET COPIES = int	Where int is: 1-999 sets of uncollated documents.
	<esc>&amp;I int X</esc>	Where <i>int</i> is: 1-999
Simplex	@PJL SET DUPLEX =	Where value1 is OFF: simplex
	value1	
	<esc>&amp;I int S</esc>	Where int is 0: simplex

Feature	Implementation	Values
Duplex	@PJL SET DUPLEX =	Where value1 is ON: duplex
	value1	Where <i>value2</i> is one of the following:
	@PJL SET BINDING =	LONGEDGE
	value2	SHORTEDGE
		(value2 is used combined with value1 = ON)
	<esc>&amp;I int S</esc>	Where int is one of the following:
		1: Duplex long edge binding
		2: Duplex short edge binding
Orientation	@PJL SET ORIENTATION	Where value is one of the following:
	= value	PORTRAIT
		LANDSCAPE
	<esc>&amp;I int O</esc>	Where int is one of the following:
		0: Portrait
		1: Landscape
		2: Reverse Portrait
		3: Reverse Landscape
Force short	@PJL SET	Where <i>value</i> is one of the following:
edge feeding	PAPERDIRECTION = value	SEF: Short Edge Feed
		LEF: Long Edge Feed
Job Mode	@PJL JOB MODE = value	Where value is PRINTER: Printer
Job Type	@PJL SET HOLD = value1	Where <i>value1</i> is one of the following:
(Secure Print		PROOF: proof print
/ Proof Print)		STORE: confidential print (secure print)
		BOXSTORE: box accumulation
	@PJL SET HOLDKEY ="	TI HOLDKEY : II .
	four-digit string"	The HOLDKEY variable acts as a password without
		encryption to protect a held job.
		Four-digit string can be any four-digit value from 0000
		to 9999. The default value is "". When "" (null) is
Jah Dagad	&D.H. OET JODATTO	specified, no password is required.
Job Based	@PJL SET JOBATTR =	Where <i>string1</i> is a maximum of 32 ascii characters (in
Accounting or	"@JOAU = string1"	the range 20 – 7E hex) indicating job owner (case
Auditron		sensitive).
(which ever is	@PJL SET JOBATTR =	Where string2 is a maximum of 12 ascii characters (in
enabled)	"@JOAP = string2"	,
	@JOAP = String2	the range 20 – 7E hex) indicating password without encryption. Null is a valid entry (zero length string).
		encryption. Null is a valid entry (zero length stillig).
		Where string3 is a maximum of 32 ascii characters (in
	@PJL SET JOBATTR =	the range 20 – 7E hex) indicating account ID. It can
	"@DAID = string3"	be null (zero length string).
Delay Print	@PJL SET JOBATTR =	Where:
	"@PRTM =	YYYY: year (AD 2000 2099)
	YYYY:MM:DD:hh:mm"	MM: month (1 12)
		DD: day (1 31)
		hh: hour (0 23)
		mm: minute (0 59)
Banner Sheet	@PJL SET JOBATTR=	Where <i>value</i> is one of the following:
	"@BANR=value"	START: enable banner sheet
		DEVICE: use device setting
		OFF: no banner sheet
	@PJL SET JOBATTR=	Where string is a maximum of 255 ascii characters (in
	"@BCMT=comment string"	the range 20 – 7E hex) for display on the banner
		sheet.
	i .	

Feature	Implementation	Values
Unicode	<esc>&amp;t83P</esc>	The 'Unicode Text Parsing Method' is activated by
Printing		this escape sequence.
		Note: This device will not respond to the
		<esc>&amp;t1008P sequence.</esc>

## **PJL Template**

This section illustrates a standard PJL template that is used to access general print features as well as features unique to a WorkCentre. This template lists each feature and the syntax, and shows both the PCL and PJL commands required to enable the features.

#### Section 1 (Opening Command, Required for all files)

<ESC>%-12345X@PJL JOB MODE=PRINTER

#### Section 2 (PJL Set Commands)

@PJL SET RESOLUTION=600 @PJL SET COPIES=1

#### Section 3 (PCL Code used to invoke PCL Language)

@PJL ENTER LANGUAGE=PCL

Section 4 (PCL Data Stream or ASCII Document inserted here for Options such as selection Different Fonts, Simplex, Duplex, etc.)

#### Section 5 (Closing Command, Required at end of Document)

<ESC>%-12345X@PJL EOJ

#### Sample PJL Headers

This section contains examples of these commands in use.

#### **Example 1 Simple Print**

```
<ESC>%-12345X@PJL JOB MODE=PRINTER<CR><LF>
@PJL COMMENT Beginning PCL Job<CR><LF>
@PJL SET OUTBIN=MAINTRAY<CR><LF>
@PJL SET QTY=1<CR><LF>
@PJL SET RESOLUTION=600<CR><LF>
@PJL SET JOBATTR="@JOAU=John" <CR><LF>
```

#### **Example 2 Finishing Options (Stapling)**

```
<ESC>%-12345X@PJL JOB MODE=PRINTER<CR><LF>
@PJL SET OUTBIN=OUTBIN101<CR><LF>
@PJL SET FINISH=ON<CR><LF>
@PJL SET STAPLE=TOPLEFT<CR><LF>
```

#### **Example 3 Finishing Options (Punch)**

```
<ESC>%-12345X@PJL JOB MODE=PRINTER<CR><LF>
@PJL SET OUTBIN=OUTPIN101<CR><LF>
@PJL SET FINISH=ON<CR><LF>
@PJL SET PUNCH=LEFT<CR><LF>
@PJL SET JOBATTR="@PNHN=TWO"<CR><LF>
```

#### **Example 4 Proof Print**

```
<ESC>%-12345X@PJL JOB MODE=PRINTER<CR><LF>
@PJL SET HOLD=PROOF <CR><LF>
@PJL SET USERNAME="John" <CR><LF>
@PJL SET JOBNAME="Job1" <CR><LF>
```

#### Example 5 Confidential (Secure) Print without encryption (Password: 1234)

```
<ESC>%-12345X@PJL JOB MODE=PRINTER<CR><LF>
@PJL SET HOLD=STORE <CR><LF>
@PJL SET HOLDKEY="1234"<CR><LF>
@PJL SET USERNAME="John" <CR><LF>
@PJL SET JOBNAME="Job1" <CR><LF>
```

#### **Example 6 Banner Sheet**

```
@PJL SET JOBATTR="@BANR=START"<CR><LF>
@PJL SET JOBATTR="@BCMT=Please Recycle" <CR><LF>
```

# Example 7 Job Based Accounting & Auditron (User ID:Patricia, Password: none, account ID: none)

```
<ESC>%-12345X@PJL JOB MODE=PRINTER<CR><LF>
@PJL SET JOBATTR="@JOAU=Patricia"<CR><LF>
@PJL SET JOBATTR="@JOAP="<CR><LF>
@PJL SET JOBATTR="@DAID="<CR><LF>
```

#### PCL/PJL Feature Dependencies/Caveats

- All PJL commands must be in the first 2,500 bytes of the job.
- To combine printer escape commands (not including PJL commands):
  - The first two characters after the <esc> MUST be the same.
  - All alpha characters MUST be lowercase, except the final terminating character.
  - Read commands from left to right. Combine commands in the order you wish them to execute.
  - For example, combine print 5 copies (<ESC>&|5X) and use letter size (<ESC>&|2A) as
     <ESC>&|5x2A.
- In case of duplicate commands, the last one requested takes precedence.
- The @PJL SET COPIES takes precedence over the PCL escape command (<ESC>& | int X>) to set copies. In general, a PJL command takes precedence over a PCL command.
- Valid media sizes for duplexing are between [140 x 148] and [297 x 432] (mm) or all sizes that can be fed from tray1 - 4.
- Valid media sizes for single and double stapling include A3, A4, B4, B5, 8.5 x 11, 8.5 x 13, 8.5 x 14 and 11 x 17.
- Valid media sizes for quad stapling include A4 (LEF) and Letter (LEF).

#### **PCL Fonts**

The following PCL fonts are resident.

The commands in the table reference a 12-point font. If you wish to use any other point size, change the 12v within the PCL Escape Command to the desired size (.25 - 999.75).

The commands listed use the default symbol set, Roman-8. To change the symbol set, you include the alternate symbol set after the first <ESC> and before the second <ESC>. Use the line printer examples as a reference.

Font Name	PCL Escape Command
Albertus Medium	<esc>(<esc>(s1p12v0s1b4362T</esc></esc>

# PostScript Implementation

The following table contains the PostScript commands and shows the syntax required to use the feature. Following the table are examples of commands and a PS file.

For more details about PostScript commands, refer to the *PostScript Language Reference Manual, Third Edition*, ISBN 0-201-37992-8.

# PostScript Print Features/Implementation

In the following table, default values are marked with an asterisk (\*).

Feature	Implementation	Values
Media Size	<>	[width x height] in 1/72 inch(points)
	setpagedevice	[842 1191] = A3
		[595 842] = A4
		[420 595] = A5 †

	/Type 26	5 = Bright (+5)
	/Brightness int >>	4 = Bright (+4)
	>> setpagedevice	3 = Bright (+3)
		2 = Bright (+2)
		1 = Bright (+1)
		0* = Normal
		-1 = Dark (-1)
		-2 = Dark (-2)
		-3 = Dark (-3)
		-4 = Dark (-4)
		-5 = Dar (-5)
Separations	<>	Where value is one of the following:
	setpagedevice	true = Multiple color separations will be
		generated for each page of output.
		false* = All colorants will be combined into a
		single composite page on a single sheet of
		physical medium.
Separation	<>	Where value is an array.
Color Names	setpagedevice	Legal element values are the process
		colorant names implied by the process color
		model.
		Valid colorant names for each process color
		model are like the following in case of
		separation
		DeviceCMYK = cyan, magenta, yellow, black
		DeviceCMY = cyan, magenta, yellow
		DeviceRGB = red, green, blue
		DeviceRGBK = red, green, blue, gray
		DeviceGray = gray
Separation	/SeparationOrder value >	Where <i>value</i> is an array.
Order	setpagedevice	Legal element values are the process
		colorant names implied by the process color
		model.
Use CIE Color	<>	Where <i>value</i> is one of the following:
000 012 00101	setpagedevice	true = Re-map each color from device color
	Corpagodovido	space to device independent's CIE- based
		color space
		false* = Do not re-map color

# Sample PostScript Headers

#### **Example 1 Header for Simple Print**

%!PS

#### **Example 2 Header for Finishing**

(Letter paper, duplex, 10 copies with collation, stapling with left-upper single and stacker tray for output bin)

```
%!PS
<< /DeferredMediaSelection true >> setpagedevice
<</PageSize [612 792]>>setpagedevice
<</Duplex true /Tumble false>>setpagedevice
<</OutputType (STACKER TRAY)>>setpagedevice
<</Collate true>>setpagedevice
<</NumCopies 10>>setpagedevice
<</Staple 3 /StapleDetails << /Type 7 /Location 0 >> >>setpagedevice
```

#### PostScript Feature Dependencies/Caveats

- All DSC (document structure convention) comments are ignored and not interpreted.
- Valid media sizes for duplexing are between [253 x 360] and [841 x 1224] (point) or all sizes that can be fed from tray 1 - 4.
- Valid media sizes for single and double stapling include A3, A4, B4, B5, 8.5 x 11, 8.5 x 13, 8.5 x 14, 11 x 17, and 8 x 10.
- Valid media sizes for quad stapling include A4 (LEF) and Letter (LEF).
- Valid media classes for duplex are fine paper, stationary, recycled paper, user1-5 paper, thick paper 1, and coated paper, pre-punched, letterhead, preprinted and other paper.
- Valid media classes for staple are fine paper, stationary, recycled paper, stationary side 2, user1-5 paper, thick paper 1 finisher and, coated paper 1 finisher, pre-punched, letterhead, preprinted and other paper for B-Finisher and C-Finisher. For C-Finisher, thick paper 1 (including A-S), thick paper 2 (including A-S), thick paper 1 reverse, thick paper 2 reverse, coated paper 1 and coated paper 1 reverse are also valid.
