Xerox® Capture and Content App
Transforming manual, paper-driven business processes into digital.

We help you automate labor-intensive workflows by capturing and managing content for seamless collaboration and increased productivity.

Workflows

- Launch App.
- Select the workflow.
- Scan documents.
- Send documents.
- Global Capture Platform receives files.

With this app on your Xerox® ConnectKey® Technology-enabled multifunction printer (MFP), you just walk up, scan your documents and connect to Xerox® Capture and Content Services¹ integrating into centrally managed workflows.

Simplify and automate tasks ensuring documents are sent directly to the systems your business relies on – with minimal touches – and meet your specific needs.

After receiving the documents, our Global Capture Platform delivers intelligent capture capabilities integrating the scanned pages using the MFP app with other documents coming from multiple sources such as scanners, on-site centers, off-site locations and Xerox scanning and indexing centers. It’s designed to automatically extract data, classify documents and route critical information to initiate processes in downstream line of business systems and content management platforms.

Your workplace assistant is ready and waiting.

Streamline workflows and tame complex or time-consuming processes in any work setting with Xerox ConnectKey Technology-enabled Devices and Apps.
It’s just what you need for capturing your documents to business workflows.

Finding new ways to automate and streamline everyday business processes can save time and money. With Xerox Capture and Content App and Xerox Capture and Content Services you can open new possibilities for a more efficient workplace.

**USE CASE EXAMPLES.**

**Accounts payable services.**
Invoice capture, match and validate service, which provides structured output data for easy integration.

**Digital mailroom services.**
Access inbound paper and digital mail regardless of location. Automated feed of core client workflow solutions and content management tools.

**Backfile scanning.**
Capture documents with intelligence to ensure accessibility and security.

**Health records automation.**
Change the way patient records are recovered, stored and accessed, with full security standard compliance the whole way through.

**THIS IS HOW IT WORKS.**

1. Select one of the available workflows.

2. If needed, enter any additional information.

3. Select scanning options and scan document.

4. Check Job Summary and receive confirmation.
