Xerox® FreeFlow® Digital Publisher
Automating print and digital production
to open new horizons for you and your customers.
Everywhere you go, everywhere you look, you see people using their smartphones and tablets—and that includes the workplace. The use of these devices for business purposes is growing exponentially. In fact, it’s expected that more than one billion employee-owned smartphones and tablets will be in use in the enterprise by 2018.*

Corporate mandates, new business requirements, and evolving customer needs have compelled many companies to transition content to include electronic formats. How people consume information is also changing—the consumer experience differs greatly depending on whether the content is viewed in a print format, or as a mobile digital document.

In light of these powerful usage trends, how well are you positioned to serve your customers’ changing needs? Do you have the resources you need to remain relevant in the marketplace?

FreeFlow® Digital Publisher delivers seamless print-to-digital production.

More value for your customers. More opportunity for you. How can you achieve digital integration without remaking your whole operation? FreeFlow® Digital Publisher makes it easy. This integrated print and e-Publishing solution helps automate your print operation—while helping you generate new opportunities for expanded reach and revenue. FreeFlow® Digital Publisher is available in multiple options that suit your individual software needs, from light to heavy use, onsite or in the cloud. Choose the configuration that is right for you.

FreeFlow® Digital Publisher takes almost any job you traditionally print today, and automatically transforms and optimizes the content for delivery via today’s digital media. As a result, your customers can reach a broader audience through Web browsers; mobile apps that can be downloaded from the Apple® iTunes® Store, Google Play®, or the Amazon® App Store; and links to content sent via social media.

Bringing print to life. FreeFlow® Digital Publisher dramatically enhances your customers’ documents by creating interactive, impactful electronic versions of printed communications that include the ability to add rich media such as video and audio, live hyperlinks, and slide shows. This significantly enhances the reader experience—adding value to your customers’ communications and to your services. Best of all, it’s ideal for most print production jobs.

A print + electronic approach = a competitive edge for you.

FreeFlow® Digital Publisher helps give you a competitive edge.

With FreeFlow® Digital Publisher, you get print and e-Publishing automation from a single, unified workflow. This saves time and reduces your costs by automating your print production, while adding a new revenue stream to your business with new digital and mobile content production.

The support and professional services you need to get the results you want.

It’s easy to get up and running with FreeFlow® Digital Publisher. Xerox provides simple “getting started” tools to jump-start your productivity, and assistance every step of the way—such as market and business development tools, plus professional services and support.

- **First**, your Xerox team conducts an initial consultation and recommends a specific set of services to meet your needs.
- **Next**, if you choose the on-site configuration, Xerox experts install and configure your solution—including developing and customizing your workflows to ensure that they integrate with existing applications to minimize your costs. No matter what configuration you choose, Xerox provides all the training you need.
- **Finally**, through end-to-end validation of your workflows, your Xerox team applies its expertise to ensure quality and efficiency. On-site or remote sales training helps you start seeing results quickly.

With Xerox support, you get the confidence and peace of mind that comes from working with a financially strong, global leader—so you can confidently enter the future of print and beyond, where opportunity, efficiency, and simplicity come together to build success.

Available Xerox® Professional Services include:

- **Digital conversion services**: Converting the PDF to digital, embedding rich media, and helping your customers keep their content fresh and relevant to encourage readership.
- **Hosting and management**: Content hosting and maintenance of the digital Web reader and apps, and archiving of up to 200 back issues.
- **Access control**: Controlling access to content in the Web reader and apps via subscriber management, publisher site login, IP authentication, subscriptions, open issues, and more.
- **Content delivery**: Email notification services with click-through and open-rate reports, first-issue instant delivery, automated “push” notifications, Web reader and app tracking data, and reader behavior data (subscriber-specific usage and activity data).
- **Optimization**: Best practices and analytics consultation to help your customers make informed decisions to improve the effectiveness of future content.
- **App help**: You supply assets and information, we build and submit your app. We know how to navigate the app stores to help you get approval.
Flexible options that allow you to test the digital waters...

**FreeFlow® Digital Publisher Cloud Configuration.**

A cloud-based solution for print, web, and mobile production that automates your print and e-Publishing production workflow. This configuration is much like the on-site version, but resides in the cloud to get your production workflow automated without the upfront investment necessary for server hardware. You’re up and running quickly in the cloud, producing digital and mobile versions of your print jobs seamlessly, all from the same unified workflow. With the cloud configuration, there’s no need for software installation and expensive IT support resources. You get all the benefits of print automation and digital publishing with the same detailed insights into readership to help your customers perfect their digital content.

**FreeFlow® Digital Publisher e-Publishing Configuration.**

A cloud-based, e-Publishing focused solution. If you’re not quite ready to revamp your existing print production workflow—but would still like to “get in the game” and provide web editions and mobile apps for your customers—now you can choose the e-Publishing Configuration. The cloud-based, e-Publishing configuration allows you to efficiently publish and distribute digital content with interactive and mobile versions, without touching what you do for your print business. Simply submit jobs through FreeFlow® Core Cloud, and the no-touch digital workflow automates the production of digital content for a variety of reading platforms, including online (PC or Mac), smartphones, and tablets—and the same detailed readership analytics will help your customers perfect their digital content. With the e-Publishing Configuration there’s no need for on-site installation. Best of all, it is easily upgradable to the Cloud and Onsite configurations as your needs change.

“Print is only one component in today’s complex communications channel, where value is derived from combining media options.”

— InfoTrends
FreeFlow® Digital Publisher

On-site Configuration.

A locally installed solution for print, web and mobile production puts automation in your hands in two ways—for print production, and digital content production. This on-site solution provides maximum performance for print production using FreeFlow® Core, while also putting new revenue in your hands by producing interactive digital and mobile content for those same print jobs. You receive an input PDF from your customer, and FreeFlow® Digital Publisher seamlessly converts it to digital formats by using our new, browser-based, configurable workflow automation software. Give yourself a competitive edge with multi-channel services that differentiate you from your competition, and extend your customers’ reach from thousands to potentially millions or even billions of readers.

¹Local server required for FreeFlow® Core installation. e-Publishing dashboard, web editions and Analytics are cloud based.
²All software components are cloud based.
Easily create vivid digital versions of the documents you print today.

FreeFlow® Digital Publisher delivers the same high-resolution imagery you’ve come to expect from Xerox® print and digital versions of content—with crisp, clear photos, graphics, and text in both replica and non-replica formats. An option for one- or two-page views that caters to reader preferences is just one of the features of this exciting digital publishing solution.
With FreeFlow® Digital Publisher, mobile articles are automatically optimized for viewing on today’s variety of mobile devices.

ZEMAITIS Generation 2 MFA-101 NT

Opening the case of a Zemaitis “metal front” guitar is like being walked to the rim of the Grand Canyon blindfolded and having the cloth ripped away to reveal the vista. They’re breathtaking guitars but also breathtakingly expensive. Unless you’re rock royalty, naming a Zemaitis has traditionally been a pipe dream. Enter the Generation 2 MFA-101 NT, a Korean-built Zemaitis that combines the quality and splendor of early ’70s originals with a price that regular players can afford.

Knight’s Armor

Tony Zemaitis, who passed away in 2005, arrived at his signature metalfront design while trying to solve a practical problem. Bothered by the buzzing that lighting, poor wiring, and funky electronics could cause, he needed a way to prevent a metal plate from contacting a guitar. The resulting “Knight’s Armor” system can be found on all Zemaitis guitars and this one.
