

# Xerox® Common Access Card Authentication System

Advanced security for office printers and multifunction printers.

The Xerox® Common Access Card Enablement Kit brings an advanced level of security to sensitive government information for a range of Xerox® Single Function Printers (SFPs) and Multifunction Printers (MFPs).

## **XEROX® COMMON ACCESS CARD AUTHENTICATION SYSTEM (CAC)**

A key benefit of the CAC system is its two-factor authentication requirement. Users must insert their access card and enter a unique PIN at the device, providing added security in the event that a card is lost or stolen. The Xerox® printer or multifunction printer validates the revocation status on all certificates (KDC and user) using the Online Certificate Status Protocol (OCSP). All features can be set up to require CAC authentication.

## **CLONING FEATURE SAVES TIME AND ELIMINATES ERRORS**

The cloning feature in the Xerox® Common Access Card Authentication System reduces setup time for multiple SFPs/MFPs and reduces the potential for errors. Set up on one SFP/MFP, save a clone file with all your settings and then download the clone file to each additional device.

## **CAC ENABLEMENT KITS**

Kit includes: Card Reader, mounting hardware and Feature Enablement Kit with installation instructions.

## **COMPATIBLE WITH A RANGE OF XEROX® DEVICES**

### **CAC Enablement Kit Part #497K21650:**

- AltaLink® C8130/C8135/C8145/C8155/C8170
- AltaLink® B8145/B8155/B8170
- AltaLink® C8030/C8035/C8045/C8055/C8070
- AltaLink® B8045/B8055/B8065/B8075/B8090
- PrimeLink® C9065/C9070
- PrimeLink® B9100/B9110/B9125/B9136

## **THE CAC SYSTEM**

Once a card is inserted into a reader, the CAC system uses standard protocols to validate the card against information within a government server. The CAC system checks to ensure the identity card has not been revoked and then either grants or denies access to the MFP. When the card is removed from the reader, the session ends and all features on the device are automatically protected until the next user is validated.

## **GREAT NEWS**

CAC Enablement comes standard with all Xerox® VersaLink® Products. The CAC Enablement Kit is only required if a card reader and mounting hardware are needed.

- VersaLink® B400/B405
- VersaLink® C400/C405
- VersaLink® C500/C505
- VersaLink® C600/C605
- VersaLink® B600/B610/B605/B615
- VersaLink® C7020/C7025/C7030
- VersaLink® B7025/B7030/B7035
- VersaLink® C7000/C8000/C9000
