Access Control and Reporting Software

Color cost and  
access control  
made easy

# Xerox Page Accountant™

## Powered by Equitrac®

Unleash the power of color with this simple, virtually automatic software solution that helps you make access to color output easily controllable while keeping its cost manageable.

### Access to color . . .

Until recently, workers who needed to produce documents in color would often go outside company channels to purchase their own desktop color printers. While inexpensive to buy, these slower personal devices incur significantly higher per-page output costs, leading to unforeseen departmental expenses and even environmental impacts.

The Xerox WorkCentre Pro® multi-function device changes all that, by reducing the cost of brilliant color to just pennies a page. With the added capability of Xerox Page Accountant™ companies can easily control access to this advanced digital equipment — allowing them to unleash the persuasive power of color while better managing its costs.

### . . . easily controlled and accounted for.

Simple to install, implement and use, Xerox Page Accountant allows system administrators to define color output quotas for authorized users. The solution also provides basic accounting and simplified reporting on total usage — essential to achieving Smarter Document Management™ of printing expenses.

For even more powerful print tracking and document insight, customers with Xerox Page Accountant can easily transition to fully featured version of Equitrac Office.

Xerox Page Accountant can change the way organizations view color printing, taking it from an expensive, ad-hoc solution to a well-planned company-wide strategy.

### Benefits at a Glance

- Tracks total output of prints and copies by user
- Effective desktop control of access to color output
- Reduces waste
- Manages output costs
- Simple installation and configuration
- Runs as an application on any PC, no dedicated server required
- Easy interactive user and device reports

### Effective Output Control in Action

Xerox Page Accountant makes it easy for system administrators to set color output quotas for authorized users.

- In a retail setting, managers might be allowed to print sales reports and point-of-sale materials in color, while associates might be limited to use of black and white for time sheets and other routine documents.
- In an advertising agency, the creative department could be authorized for color, with the account team restricted to black and white.
- In an office setting, executives and their support staffs can print in color, while employees are restricted to printing in black and white.

### Minimum Requirements:

WorkCentre Pro or Document Centre Multi-function devices equipped with Network Accounting accessory.  
 1 GHz or faster processor  
 256 MB of memory  
 10 MB of available disk space  
 Windows® 2000 or Windows® XP
