

Fleet Management is Now Even Easier

Xerox® CentreWare® Web Software (version 6.3)

The advanced capabilities of Xerox® CentreWare Web Software make it easy to intelligently manage your print devices from a single powerful interface. With this latest update, you can do even more.

CentreWare Web Software Version 6.3 is available as a free download.

NEW FEATURES

Upgrade How You Upgrade

- Improve upgrade performance by transforming a subset of your multifunction printers into firmware distribution hubs
- Enhance upgrade reliability with a device-managed upgrade schedule

- Use advanced scheduling capabilities to download and install files when it makes sense for your business
- Coordinate multiple updates at once with Multiple Version Upgrade Path functionality

Password Management Made Easier

- Update passwords at scale with the new Password Policies feature
- Track which passwords are used on which devices and when
- Receive admin audit reports for verified passwords

Proactively Protect Devices, Documents and Data*

- View a complete breakdown of all security events in the previous 30 days with the McAfee Security Monitoring dashboard
- Track security event trends over the previous 12 months with the McAfee Monitoring Trend chart
- Quickly address individual security events with comprehensive auditing

Automate Remote Device Discovery

- Automatically initiate contact and connect to the CentreWare Web server with supported devices
- Set policies to instantly and automatically configure devices once they're discovered

ENHANCEMENTS

Improved Error Message Clarity

- Enjoy simpler, more specific text in error messages
- Quickly diagnose and troubleshoot with clear, direct messages for SNMP set errors
- Accelerate recovery time with new device status categories

Simplified Policy Configuration

- Access history and actions under the same tab with the simplified user interface
- Experience greater consistency between the Configuration Policies and Firmware Upgrade Policies screens
- Receive optional audit reports whenever a policy error occurs
- Configure settings remotely through the Embedded Web Server on each device

More Dynamic Dashboard Capabilities

- View up to 12 months of overall device compliance data at once
- See a breakdown of compliance by model across multiple policies
- Automatically track the results of firmware and configuration policy after remediation
- Easily check up on the overall schedule of policies defined in Xerox® CentreWare Web Software

Expanded Deployment Options Support

- Regional support is now available for the Netherlands
- Support for the SQL 2017 and SQL Azure database platforms has been added
