

Fleet Management is Now Even Easier

Xerox® CentreWare® Web Software (version 6.5)

The advanced capabilities of Xerox® CentreWare Web Software makes it easy to intelligently manage your print devices from a single powerful interface. With this latest update, you can do even more.

CentreWare Web Software Version 6.5 is available as a [free download](#).

NEW FEATURES

Upgrade How You Upgrade

- Improve upgrade performance by transforming a subset of your multifunction printers into firmware distribution hubs
- Enhance upgrade reliability with a device-managed upgrade schedule
- Use advanced scheduling capabilities to download and install files when it makes sense for your business

- New dashboard view provides configuration policy compliance status and overall device health – including quick navigation to the device – at a glance
- Coordinate multiple updates at once with Multiple Version Upgrade Path functionality

Password Management Made Easier

- Use device passwords that comply with NIST 800-171 standards (requires device support)
- Discover and manage printers manufactured with unique admin passwords and SNMP community strings (California Password Law – SB 327)

Proactively Protect Devices, Documents and Data*

- View a complete breakdown of all security events in the last 30 days with the McAfee Security Monitoring dashboard
- Track security event trends over the previous 12 months with the McAfee Monitoring Trend chart

Automate Remote Device Discovery and Management

- Automatically initiate contact and connect to the CentreWare Web server with supported devices
- Set policies to instantly and automatically configure devices once they're discovered – including installation capabilities for new devices, simplifying initial configuration policy work
- Remote data collection of card reader information – including remote firmware update for select card readers

ENHANCEMENTS

Improved Error Message Clarity

- Enjoy simpler, more specific text in error messages and accelerate recovery time with new device status categories
- Quickly diagnose and troubleshoot with clear, direct messages for SNMP set errors

Simplified Policy Configuration

- Access history and actions under the same tab with the simplified user interface
- Simplified workflow for generating configuration policies, including pre-defined configuration sets for common workflows
- Expanded remote configuration settings
- Enhanced configuration set search functions allow multiple keyword entries and clarify search results
- Receive optional audit reports whenever a policy error occurs

More Dynamic Dashboard Capabilities

- View up to 12 months of overall device compliance data at once
- See a breakdown of compliance by model across multiple policies
- Automatically track the results of firmware and configuration policy after remediation
- Easily check up on the overall schedule of policies defined in Xerox® CentreWare Web Software

Expanded Deployment Options Support

- Regional support is now available for the Netherlands
- Support for the SQL 2017 and SQL Azure database platforms has been added
