

Achieve peak performance
without peak effort.

Xerox® Trivor® 2400 HD Inkjet Press

Take your operation to new heights.

The Xerox® Trivor® 2400 HD Inkjet Press combines a base of proven imaging technologies with new innovations to deliver the next level in 20" continuous feed performance—all in a highly compact footprint. Coupled with a choice of digital front ends, this system makes the process of meeting demanding SLAs easier than ever before.

Balance cost, quality, and productivity with one flexible system.

CHOOSE RESOLUTION:

360 x 600 dpi

600 x 600 dpi

1200 x 600 dpi

VHQ Mode

CHOOSE DROP SIZE:

13 pL

11 pL

9 pL

6 pL

3 pL

CHOOSE PRESS SPEED:

656, 551, 328, and 164 feet per minute

200, 168, 100, and 50 meters per minute

ACHIEVE PEAK PERFORMANCE.

The increased speed of the Trivor 2400 delivers maximum capacity in a minimized footprint, making it the most robust performer for its size. New innovations optimize every square foot so you can reliably deliver on demanding SLA-driven timelines.

- **Over 2,400 full-color impressions per minute** with speeds up to 551 feet/ 168 meters per minute.
- **Over 2,850 monochrome impressions per minute** with speeds up to 656 feet/ 200 meters per minute.

DELIVER TODAY'S APPLICATIONS WITH CONFIDENCE.

Minimize the cost, image quality, and productivity trade-offs you would otherwise have to make with a one-size-fits-all system. The flexibility built into the Trivor 2400 lets you optimize attributes on a job-by-job basis with choices of resolution, drop size, and variable press speeds so you can deliver on today's demands. And, the expanded media range of the press makes it possible to run higher-value applications while leveraging the attractive economics of inkjet.

MAINTAIN CONSISTENT IMAGE QUALITY.

The Trivor 2400 couples proven Impika® ink and print head technologies with new automation capabilities that make its image quality consistently excellent. Together, these technologies ensure you spend less time maintaining the press and more time running.

- **Missing jet detection and compensation** automatically detects the occurrence of missing jets and minimizes their appearance by exercising neighboring nozzles.
- **Automated density optimization** provides smooth, consistent color across each page.
- **Clear pixel technology** maintains print head health and longevity by continuously exercising nozzles without creating waste or impacting finishing.
- **Adjustable print speed** allows you to slow the press down to 1 meter per minute at any time during a production run for on-press inspection, eliminating unexpected results.

TURN PLAIN PAPER INTO HIGH-QUALITY PRINTS.

High Density (HD) inks deliver outstanding quality across a range of media, including plain offset, inkjet treated, and inkjet matte coated stocks.

- **HD inks are optimized to achieve an extended color gamut** on plain, uncoated papers to keep paper costs low.
- The long open time of the ink (up to 20 minutes) **keeps the press running, minimizing costly purge cycles.**

NEXT LEVEL PRODUCTION IN A HIGHLY COMPACT FOOTPRINT.

The Trivor 2400 is the highest performing small footprint production inkjet system on the market today, making it a perfect addition to shops with limited floor space or those in need of additional, reliable production.

Get more out of every square inch of their production space with the press' 20" web, which delivers 2-up duplex printing in a single tower. That's serious production without serious overhead.

HIGH-QUALITY, PLAIN-PAPER PRINTING.

High Density inks are optimized to produce vibrant quality across a wide range of media, including low-cost plain, uncoated stocks.

TRANSACTION

White paper workflows eliminate pre-printed shells and allow personalized advertising opportunities on statements.

DIRECT MARKETING

The use of data to drive relevant offers helps you help marketers address rising postal costs and produce more targeted, higher-value mailers.

BOOKS

Flexible print solutions make it easy to support publishers' inventory management strategies in the face of declining volumes.

Be ready for tomorrow's innovations.

The Trivor 2400 continues our scalable development strategy with a newly designed transport base and enhanced dryer technology that ensures you get maximum investment protection.

- Upgrade from monochrome to color.
- Add speed and resolution options.
- Continue to expand your media range.
- Upgrade with future innovations to support applications such as catalogs and magazines.
