Achieve peak performance without peak effort.

Xerox® Trivor® 2400 HD Inkjet Press
Take your operation to new heights.

The Xerox® Trivor® 2400 HD Inkjet Press combines a base of proven imaging technologies with new innovations to deliver the next level in 20” continuous feed performance—all in a highly compact footprint. Coupled with a choice of digital front ends, this system makes the process of meeting demanding SLAs easier than ever before.

Balance cost, quality, and productivity with one flexible system.

ACHIEVE PEAK PERFORMANCE.
The increased speed of the Trivor 2400 delivers maximum capacity in a minimised footprint, making it the most robust performer for its size. New innovations optimise every square foot so you can reliably deliver on demanding SLA-driven timelines.

- **Over 2,400 full-colour impressions per minute** with speeds up to 168 meters /551 feet per minute.
- **Over 2,850 monochrome impressions per minute** with speeds up to 200 meters/656 feet per minute.

M A I N T A I N C O N S I S T E N T I M A G E Q U A L I T Y.
The Trivor 2400 couples proven Impika® ink and print head technologies with new automation capabilities that make its image quality consistently excellent. Together, these technologies ensure you spend less time maintaining the press and more time running.

- **Missing jet detection and compensation** automatically detects the occurrence of missing jets and minimises their appearance by exercising neighboring nozzles.
- **Automated density optimization** provides smooth, consistent colour across each page.
- **Clear pixel technology** maintains print head health and longevity by continuously exercising nozzles without creating waste or impacting finishing.
- **Adjustable print speed** allows you to slow the press down to 1 meter per minute at any time during a production run for on-press inspection, eliminating unexpected results.

D E L I V E R T O D A Y ’ S A P P L I C A T I O N S W I T H C O N F I D E N C E.
Minimise the cost, image quality, and productivity trade-offs you would otherwise have to make with a one-size-fits-all system. The flexibility built into the Trivor 2400 lets you optimise attributes on a job-by-job basis with choices of resolution, drop size, and variable press speeds so you can deliver on today’s demands. And, the expanded media range of the press makes it possible to run higher-value applications while leveraging the attractive economics of inkjet.

**High Density (HD) inks deliver outstanding quality across a range of media, including plain offset, inkjet treated, and inkjet matte coated stocks.**

- HD inks are optimised to achieve an extended colour gamut on plain, uncoated papers to keep paper costs low.
- The long open time of the ink (up to 20 minutes) keeps the press running, minimizing costly purge cycles.

The Trivor 2400 is the highest performing small footprint production inkjet system on the market today, making it a perfect addition to shops with limited floor space or those in need of additional, reliable production.

Get more out of every square inch of their production space with the press’ 20” web, which delivers 2-up duplex printing in a single tower. That’s serious production without serious overhead.

High Density inks are optimised to produce vibrant quality across a wide range of media, including low-cost plain, uncoated stocks.

The Trivor 2400 continues our scalable development strategy with a newly designed transport base and enhanced dryer technology that ensures you get maximum investment protection.

- Upgrade from monochrome to colour.
- Add speed and resolution options.
- Continue to expand your media range.
- Upgrade with future innovations to support applications such as catalogs and magazines.

Be ready for tomorrow’s innovations.

The use of data to drive relevant offers helps you help marketers address rising postal costs and produce more targeted, higher-value mailers.

Flexible print solutions make it easy to support publishers’ inventory management strategies in the face of declining volumes.

High-quality, plain-paper printing.
**TECHNOLOGY**

- **Printheads**: Drop-on-demand piezoelectric
- **Printing process**: Single tower, single pass 2-up duplex, mono or colour
- **Drop volumes**: 3, 6, 9, 11, 13 pl
- **Print resolutions**: 600 x 600 dpi; 1200 x 600 dpi (option); 360 x 600 dpi (option); VHQ mode (option, mono only)
- **Printing speed**: Up to 551 fpm (168 mpm) colour; up to 656 fpm (200 mpm) mono
- **Printing width**: Up to 474 mm (18.66”)
- **Recommended duty cycle**: 4–35 million letter/A4 impressions per month (in CMYK, 600 x 600 dpi resolution)
- **Maximum duty cycle**: Up to 57 million colour or 68 million mono A4 /letter impressions per month
- **Head servicing**: Automated head cleaning (purging, wiping, capping)

**INKS**

- **Ink types**: Aqueous HD (High Density) pigment ink
- **Colour configurations available**: 1 or 4 colours, field upgradable

**PAPERS**

- **Paper characteristics**: Uncoated, inkjet treated, inkjet matte and silk coated. Other papers may be suitable, subject to testing*
- **Paper weight**: From 52 to 250 gsm*
- **Paper width**: 210 mm–510 mm (8” to 20”)

**DRYER**

- **Dryer characteristics**: 44 kW max (2 dryers x 12 infrared lamps per dryer x 1.85 kW)

**PRINT TOWER**

- **Dimensions**: 3,638 mm x 2,772 mm x 2,316 mm (11.9’L x 9.1’D x 7.6’H)
- **Weight**: 3,000 kg/614 lbs (mono or simplex), 3,500 kg /7716 lbs (duplex colour)

**SOFTWARE INTERFACE SOLUTIONS**

- **Controller**: aStream Controller
- **Key features**: Colour Management Toolkit for ICC profile management, insertion of blank pages, bar codes, flush lines, merging of files with background form/images, submission of multiple PDF files as single job, reordering print order, MICR IPDS/PDF/AFP support, hot folder submission, job queue management and imposition tools

**OPERATING ENVIRONMENT**

- **Nominal operating conditions**: 20–30°C (68–86°F) at 40–60% RH
- **Optimal printing quality**: 23–27°C (73–81°F) at 50% RH
- **Operating noise**: Less than 78 dB
- **Heat output**: 75,000 BTU (for max dryer assemblies at maximum speed)
- **Power supply**: 100–240 V, 32 A + 400–415 V, 125 A (for max dryer assemblies)
- **Certifications**: CE, RoHS, UL/CSA, TÜV

**OPTIONS**

- **Finishing**: Rewind Unit, Puncher, Cutter, Folder, Stacker or any compatible finishing device (may require testing)
- **Other options**: Additional resolution mode or speed, additional printhead, heavyweight paper kit
