

Xerox® Workplace Suite

On-premise, server-based print management and mobile access for your printer fleet, with benchmark security, convenience and usage insights you need to unleash productivity and reduce costs.

On-Site, Your Server

Xerox® Workplace Suite is a complete print management and mobility platform that installs on your server for a private, secure, on-site deployment. It's licensable as a mobility or print management solution separately or in combination. Choose the features that fit your needs.

AUTHENTICATION AND ACCESS CONTROL

Flexible authentication options to unlock your printer, securely release your pull print jobs and access your MFP Apps.

- Flexible card-based reader authentication option — compatible with a wide range of industry-standard secure readers and cards
- Mobile authentication with NFC, QR code or mobile app-unlock code feature

- PIN-only, confirmation number or user name and password authentication as an alternate login
- Integration with Microsoft® Active Directory

SINGLE SIGN ON (SSO)

Make use of our single sign on capability to access your SSO-enabled apps. Conveniently authenticate at the printer once and then securely access all your MFP SSO-enabled apps without having to remember long passwords or perform any additional, time-consuming login steps.

To ensure peace of mind, all credentials are kept safe using login tokens stored and retrieved using triple encryption within a tamper-proof software vault.

ACCOUNTING, REPORTING AND RULES

Administrators can set access control and print rules, and closely monitor printing across the organization with our consolidated fleet reporting and accounting capability.

You'll get job-based reporting for print/fax/copy/scan and monthly usage reporting available with on-premises installation. Xerox® Workplace Suite also integrates with Network Accounting.

EASY MOBILE PRINTING

Print seamlessly from Microsoft® Windows® OS devices and Google® Chromebooks™, Mac® OS, Linux® and mobile app printing for iOS, Android and Windows Surface® tablets. There's also a mobile printing option utilizing a basic rendering engine.

- Select your office documents, photos, PDFs and more
- Find the closest printer and manage your print settings
- Select and preview your document
- Securely release your document to print
- Integrates with our Xerox® Standard Accounting Feature

With a traditional pull/follow printing workflow, send jobs to a single queue for release and retrieve when ready.

CONTENT SECURITY

Our Content Security feature safeguards against data or intellectual property loss by searching all documents copied, scanned or printed through a licensed MFP for specific user-defined terms or text strings (e.g., confidential, internal use only, etc.). If a match is found, an alert — along with job details and content — will be sent to an administrator for follow-up.

Xerox® Workplace Suite

Boost productivity and control costs with an easy-to-use, affordable management and mobility solution.

Xerox® Workplace Suite Features	Xerox® Device	Non-Xerox® Device
Authentication		
Card and Mobile (NFC) Authentication using industry-standard card reader with direct USB	Yes	Yes — Requires networked device
PIN, card and PIN authentication	Yes	No
Network credentials, email and password or PIN	Yes	No
Unlock MFP with mobile device (no card reader)	Yes**	No
Single sign on to SSO-enabled apps (available in Xerox App Gallery)	Yes	No
Desktop Printing		
Traditional pull/follow printing workflow (job waits on server)	Yes	Yes*
Printer client pull/follow printing workflow (job waits on client until pulled to printer)	Yes	Yes*
Mobile Printing (supports iOS and Android™)		
Native Microsoft® Office (PowerPoint®, Word, Excel®, Web pages, Adobe® PDF and Photos), Apache™ OpenOffice™ documents	Yes	Yes
Direct Print to printer email address/subject field or Xerox® Print Portal App	Yes	Yes
Pull Print submission via email or Xerox® Print Portal upload	Yes	Yes
Apple® AirPrint® support	Yes	Yes
Copies, two-sided, stapling, preview and more	Yes	Yes
GPS locator, find printer locations	Yes	Yes
Select printer using QR code	Yes	No
Support for cellular and wireless client	Yes	Yes
Chromebook™ Printing		
Direct Print from Chrome OS™ and Chrome™ browser	Yes	Yes
Pull/follow Print from Chrome OS and Chrome browser	Yes	Yes*
Embedded Release App		
View, edit or delete jobs via MFP app	Yes	No
View, edit or delete jobs via Xerox® Print Portal App	Yes	Yes
Auto population of email address for logged-in user	Yes	No
Reporting and Accounting		
Enhanced print accounting to deliver user, departmental and printer tracking with graphical reports	Yes	Yes
Tracking for all services (copy, fax, scan, etc.)	Yes	No
