¹ Products undergoing evaluation; ² These products are Citrix Ready when using either the Xerox® Global Print Driver®, the product native print driver or the Citrix universal driver;

³ Does not include WorkCentre 3315; ⁴ Device is compliant / tested, but has not been formerly certified. ⁵ WorkCentre 3225 only; ⁶ XenApp 5.0 and up; ⁷ DN configuration only;

⁸ Requires optional wireless network adapter; ⁹ AltaLink B8065/B8075/B8090 only

PRINT DRIVER / SERVER ENVIRONMENT CERTIFICATIONS

Microsoft® WHQL Certification

Windows Hardware Quality Labs testing involves running a series of tests on third-party hardware or software, and then submitting the log files from these tests to Microsoft for review. Xerox® products that are Windows Hardware Quality Labs (WHQL) certified comply with Microsoft standards and ensure seamless compatibility with Microsoft Windows environments.

Citrix® Certification

Citrix Systems is an American multinational software and services company that specializes in virtualization and remote access software for delivering applications over a network and the Internet. Xerox is part of the Citrix ready program, which allows vendors to perform a self evaluation of its product against a set of metrics outlined by Citrix. Once the product passes certification, Xerox pays an annual fee for having its certified products listed on the Citrix website as well as the right to use its logo. This certification ensures that a product using Citrix software will function as expected in a remote environment.

IPv6 Ready

Internet Protocol version 6 (IPv6) is a relatively new protocol for routing network traffic and identifying network-connected devices. IPv6 will be phased in over many years as the next-generation replacement for the global IPv4 standard. Because printers and multifunction printers comprise a sizable percentage of the world's networked devices, Xerox is transitioning its products' capabilities to be IPv6-compatible.

Bonjour®

Bonjour is Apple Inc.'s trade name for its implementation of zero-configuration networking, a service discovery protocol. Bonjour enables automatic discovery of devices such as printers, other computers, and the services that those devices offer on IP networks using industry standard IP protocols.

Google Cloud Print™

Google Cloud Print is a simple mobile printing solution for mobile workers that can't count on having access to the same printer or MFP all the time; or do not have the appropriate print driver software for the printer or MFP that is available. Google Cloud Print enabled printers and MFPs allow mobile workers to securely and directly connect and register with the Google Cloud Print service, so it's always available. No need to install and maintain print drivers or additional software.

Mopria®

Mopria is an acronym derived from the Mobile Print Alliance. The charter of this alliance of printer manufacturers is to create simple wireless printing from smartphones, tablets, and other mobile devices. Mopria printing does not require any driver installation or software download on these devices. Mopria Print functionality will be embedded in phones, tablets or other mobile devices and there is no set-up required. When mobile device users have access to a Mopria-certified printer, they will be able to effortlessly discover and print to this printer. Mopria will be initially supported for users of Android™ Kit Kat (4.4)-based devices using a free plug-in available in the Google Play™ store.

Wi-Fi Direct Certification

This certification lets you print from your mobile device without having to connect to a network. Adding the optional wireless USB adapter enables this connection, and allows for both an Ethernet connection and Wi-Fi Direct connection to be enabled at the same time.

Apple® AirPrint

Apple AirPrint is a driverless printing technology and was introduced with iOS® version 4.2 in November 2010. It enables Apple iOS devices including the iPhone®, iPad®, iPod touch®, and even Mac OS® X computers to print with no need to install drivers or download software. AirPrint uses well-established, familiar technologies already in use today, such as Bonjour, IPP, PDF and JPEG. AirPrint will likely continue to evolve to add new features and functionality, however, the basic operation of AirPrint will remain constant, in that it requires only a few steps to ensure it works as it was designed to do.

APPLICATION CERTIFICATIONS

Cerner Certification

Cerner is the leading U.S. supplier of healthcare information technology solutions that optimize clinical and financial outcomes. Around the world, health organizations ranging from single-doctor practices to entire countries turn to Cerner for their powerful yet intuitive solutions. Cerner offers clients a dedicated focus on healthcare, an end-to-end solution and service portfolio, and proven market leadership. Xerox pays Cerner for product certification, which is a 6-8 week process after the product is received in Kansas City. Once certified, Cerner lists the product on its internal customer website and sends Xerox a certificate. This certification allows Xerox to participate in customer bids where Cerner Certification is a requirement. Xerox also provides a product, including all supplies and service, to Cerner until that product is at end of life. Cerner Certification is important to a customer's IT staff as this allows them the comfort of having 24/7 support 365 days a year, through the Cerner help desk. Cerner provides this support as part of their HIS package. For example, a hospital can call and report a downed printer in the Emergency Room at 3 A.M. and receive remote support for that printer.

¹ On June 20, 2012, Medical Information Technology, Inc. (MEDITECH) published a statement concerning changes to its printer testing program. This statement read in part "Going forward, MEDITECH will no longer be testing laser printers. If a laser printer uses the PCL-5, 5c or 5e language, it will work with MEDITECH and will therefore be supported. All other types of printers (dot matrix, barcode) will still be tested by MEDITECH." As a courtesy to our customers, Xerox has printed and tested the consistency of MEDITECH-provided files from laser printers using PCL 6 with equivalent output from previously certified laser printers using PCL 5. Xerox has substantiated output consistency for printers using PCL 6.
